63570	10/15/2025	10/16/2025	Lee's Summit Resource Recovery Park	Odor	Lee's Summit /Jackson	KCRO	CK	Communication In Person
Concerned Party: Anonymous Concern Info: Caller concerned about the odor coming off of the composting operation at the lees summit resource recovery park. Call was not sure if it was that, the landfill, or the onsite transfer station. The caller stated that they can hear heavy machinery from the close by neighborhood where they live. They stated that the smell is the worst in the morning between 7:30 and 8:30 AM. The caller stated that they don't notice it as much in the evening hours. I stated that it was likely the composting operation that takes place on site. [sic] Conclusions: The resource recovery park had a compost fire on October 13, 2025, which likely contributed to the odor concern. The pile was still smoking some during the site visit on October 16, 2025. While a noticeable odor was present, it was not strong enough to violate the odor regulation. Site personnel are monitoring the issue and believe it is under control.								
63581	10/15/2025	10/20/2025	Anthony Kelly	Fugitive Particulate Matter	Seymour /Webster	SWRO	BD	Phone Conversation
Concerned Party: Anonymous Concern Info: Reporting party called in and stated that near the address of 4441 North Hillcrest Drive, Seymour, Missouri, a excavation company (unknown) is removing a large amount of soil, more than an acre and causing lots of dust. Caller states that there is no water truck being used. [sic] Conclusions: CON-176 No violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed on the date of the site visit. Rain from the previous weekend had suppressed fugitive emissions sufficiently. The storage company implied that they will obtain a water truck to reduce fugitive emissions when conditions allow for them to leave the property boundary.								
63595	10/16/2025	10/22/2025	Source of Concern Vernal Stewart	Open Burning Open Dumps: Construction and Demolition	Lake Lafayette /Lafayette	KCRO	DS	Report LOW
Concerned Party: Terry Crawford Concern Info: Via Webform email - Submitted at 9:16 pm Wednesday, October 15, 2025 - Date of Incident or First Noticed: 10/08/2025 I work for the local fire department. There is a person who has been tearing down trailer houses and burning them. I have contacted law enforcement and they stated they are unable to do anything about the issue. [sic] Conclusions: A Letter of Warning will be issued to Vernal Stewart for the open burning that took place based on the pictures taken by the investigator and the Odessa Fire Department.								
63598	10/16/2025	10/30/2025	Blue Ridge Mountain / Houston Excavating	Other Fugitive Particulate Matter	Independence /Jackson	KCRO	MU	Other
Concerned Party: Joel Ryburn Concern Info: Caller is concerned about what he called a demolition landfill near him, named Blue Ridge Mountain. The place is supposedly bringing in clean fill to level the lot and this has been going on for years. He said they are basically filling in a valley next to Rock Creek to bring it level with Blue Ridge Boulevard. He is concerned that they are not permitted as a landfill and that the material they are bringing in is not clean fill. He is also concerned that the trucks and heavy equipment are creating lots of dust. He said his car has been getting a film of dust on it even in the garage. He also is concerned about Rock Creek and knows that water pollution had issued them a letter some time ago and returned them to compliance. I directed him to submit a Sunshine request to get copies of the water report. He wants to know how much longer this will be going on. The caller said he has talked to the city of Independence but they are not doing anything about the site. [sic] Conclusions: No violations observed at the time of the site visit. Lance Houston stated that the site will be completely full in the next month and will end operations at the property. I attempted to call the concerned party but the voicemail box was full and I was unable to leave a message.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
63599	10/16/2025	10/17/2025	SubTropolis	Other	Kansas City /Clay	KCRO	MC	Referred to Other Agency
Concerned Party: Rishad Gonzalez Concern Info: Caller makes deliveries into the SubTropolis caves. He was delivering at 9 a.m. this morning (10/16) and he said as soon as he got there his eyes were burning from all the diesel smoke. He said everyone there was coughing and it gave him a migraine. He said the walls were black with diesel soot. He thinks there is not proper ventilation there. He said there's lot of refrigerator trucks running there. He said he has been down there many times before, but it has never been bad like this before. He said drivers will be sitting there for 2 to 3 hours waiting to be unloaded. He said many employees were having to exit the caves to get fresh air. He was at Paris Brothers, at 9000 NE Underground Drive entrance, Dock 15, Pillar 123. He said it was near the entrance on the freezer side. I recommended the caller additionally contact OSHA about this issue, and he said he would. [sic] Conclusions: This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
63603	10/17/2025	10/17/2025	APAC Quarry and Mid-States Quarry	Particulates	Bates City /Lafayette	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 7:52 am Friday, October 17, 2025 - Date of Incident or First Noticed: 10/17/2025 We live in rural Bates City and have a Davis scientific air monitor. There are two gravel quarries in less than a mile away and the PM 1 is 21, which couldn't be from exhaust since there is no major traffic. Those are the small particles that stay in our lungs. Our community was told the dust doesn't leave the quarries, but with this high of reading, it is suspicious. Accuweather doesn't report anything dangerous like this for our rural area. [sic] Conclusions: This is the fourth concern the department has received since September alleging excess emissions from these quarries based on air monitoring data. The monitors in question are not part of the State monitoring network, and previous review of data available online does not indicate the monitors near the quarry are reading significantly different than the monitors inside Kansas City. The higher than expected readings may also be due to widespread smoke or emissions from harvesting.								
63604	10/17/2025	10/17/2025	Unknown	Odor	Cole Camp /Benton	KCRO	MC	Email
Concerned Party: Mike Beeson Concern Info: Via KCRO inbox - Sent: Thursday, October 16, 2025 11:20 PM To: DNR Clean Water Subject: Inquiry into a horrible manure smell We have lived for many years at our address. For the last couple of months, we have noticed many days every week a very noticeable and unpleasant manure smell on our property. We are wanting to inquire if there has been some kind of new animal farm that has been put into our area. We do not know where to go to find out how to find out this information or what to do about this as it has become very unpleasant. Thank you very much for any help you can provide:;) [sic] Conclusions: I provided the concerned party the following information: Looking at our map of currently permitted CAFOs (https://modnr.maps.arcgis.com/apps/webappviewer/index.html?id=cf630b020a17452fb30994cb4b36f003), I see three within three miles of your area: • Rolling Acres Ranch to your north • Mazelin Chicken Farm to your southeast • Rambo Farm to your southeast None of these facilities appear subject to Missouri's odor regulations. The department lists current new or expanded CAFO facilities at: https://dnr.mo.gov/water/business-industry-other-entities/permits-certifications/pending/concentrated-animal-feeding-operation-cafo-facility-applications. There is one in Benton County, but it is out toward Windsor.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
63613	10/17/2025	10/17/2025	APAC-Kansas, Inc. - Harrisonville Quarry	Fugitive Particulate Matter	Harrisonville /Cass	KCRO	CK	Phone Conversation
Concerned Party: Anonymous								
Concern Info: Concerned party called and said they were getting a lot of dust. Concerned party stated that the wind was coming out of the south/southwest and it was very hazy to the North of the APAC Quarry location. Also believed that the wind was blowing 15-20 mph. [sic]								
Conclusions: Quarry manager was called and the concern was discussed. Manager reported that he got the water truck routed to a road that the stripping crew was running on and felt that this should resolve the issue. Will plan to do periodic surveillance.								
63617	10/17/2025	10/20/2025	Anthony Kelly	Land Disturbance Fugitive Particulate Matter	Seymour /Webster	SWRO	TP	Report TODS, UF
Concerned Party: Tim Denson								
Concern Info: The concerned party (CP) reported fugitive dust from a land disturbance site for A-K Storage. Dust is covering neighboring properties. The CP stated there were fifteen acres disturbed. The Webster County Assessor shows the total size of the property to be 21.5 acres. A review of department files shows no Missouri State Operating Permit (MSOP) has been issued for land disturbance activities at the site. [sic]								
Conclusions: CON-205 I will issue a report for operating without a permit, See AKStorage investigation report for more information.								
63621	10/20/2025	10/23/2025	Bavarian Village Resort	Asbestos	Branson /Taney	SWRO	BD	Letter LOW, RTC
Concerned Party: Anonymous								
Concern Info: Email states that concerned party called regarding a demolition in progress at Bavarian Village Resort, 509 Indian Circle Branson MO. Caller said they are demolishing A-frame structures at the resort, and he believes asbestos is present, but they are taking no precautions. There is no active notification for this location, and the caller requested to remain anonymous. [sic]								
Conclusions: CON-214 The resort owner was educated on the asbestos notification and testing requirements and compliance assistance was provided to ensure proper handling of any potential regulated asbestos material. A Letter of Warning Response Required will be issued to ensure a complete inspection is conducted, and any RACM is properly disposed of.								
63635	10/21/2025	10/27/2025	Little Blue Valley Sewer District	Odor Major Wastewater Facility	Independence /Jackson	KCRO	TC	Other
Concerned Party: Anonymous								
Concern Info: From Webform email: Date of Incident or Date First Noticed 10/20/2025 The Sewer plant has been having work done by the road on the property and kiddy corner by the stop sign. Recently we have seen water puddles where the work is being done, which isn't usual. It also seems like this spot is repeatedly needing to be fixed as both holes have been dug and covered multiple times. On the evening of October 20, 2025, we were walking past the building, not by the holes, but this time the smell was so strong, it was almost like we were tasting poop. We also were on the opposite side of the road to the plant so it was very out of the normal for it to be so strong causing some of us to gag. [sic]								
Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission.								
63642	10/21/2025	10/22/2025	Courtney Ridge Landfill, LLC	Fugitive Particulate Matter	Sugar Creek /Jackson	KCRO	JS	Phone Conversation
Concerned Party: Steve Carey								
Concern Info: Concern party stated that there has been a lot of dust coming from Courtney Ridge Landfill the past couple of days. They stated that they did talk with the manager of the landfill and he was told that they are running the water truck as much as they could to reduce dust. [sic]								
Conclusions: No violations were observed during the investigation. Dust was observed on the east side of the landfill, but it was not leaving the property. The facility is working to improve vegetative cover.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
63643	10/21/2025	10/21/2025	Former GM Leeds Assembly Plant	Asbestos	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party: Anonymous								
Concern Info: Concerned party stated that when the old GM Plant located at 6817 Stadium Drive was tore down a couple of years ago, they left the fire hydrants covered in an asbestos wrap and some pipes sticking out of the ground that also have asbestos wrapping on them. The concerned party stated that the hydrants and pipes are scattered throughout the property. Currently, the property is being used as a large parking lot for new cars. [sic]								
Conclusions: This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
63645	10/21/2025	10/22/2025	Industrial Salvage & Wrecking Co. Inc. (ISW)	General Water Quality Fugitive Particulate Matter	Kansas City /Jackson	KCRO	EC	Phone Conversation
Concerned Party: Eric Deselich								
Concern Info: There is a property located at 13949 MO 350 Hwy (Blue Parkway) Kansas City, 64139 that appears to be crushing rock and concrete. The concern party is concerned that the creek that runs along and through the property is being polluted with dust from the concrete and runoff from the rock business. The creek feeds directly into Little Blue River and is part of the watershed. There is also the issue of dust pollution to the surrounding vegetation. [sic]								
Conclusions: This is the second concern received about this situation. The air portion of the first concern was referred to the Kansas City Health Department's Air Quality Program on 10/14/2025 for investigation. This concern was referred on 10/21/2025. Issuing a Letter of Warning for operating without a permit - See Report.								
63646	10/17/2025	10/23/2025	Martin Marietta Materials, Inc. - Greenwood Quarry	Fugitive Particulate Matter	Greenwood /Cass	KCRO	DS	Email
Concerned Party: Craig Nelson								
Concern Info: It is a south wind today and the Woodland Trails neighborhood is in a cloud of dust again. When I came home from work this afternoon I pulled into the neighborhood, and it looked like it was foggy outside. I drove by where they are working on the next extension of the neighborhood and nobody was working; this is all quarry dust.On a windy day like this I am surprised the quarry continues to operate if they cannot keep the dust onsite. Wanted to share with you again as I am hoping this can get fixed long term. [sic]								
Conclusions: No violations were observed during the investigation, but the site was dusty. Emissions were below opacity limits, but the combined plume was significant. Also, aerial images indicate dust may be leaving the site to the north. The facility needs to improve dust control in order to avoid future violations. The facility agreed to investigate which units need additional controls.								
63660	10/21/2025	10/23/2025	IsoNova Technologies	Odor	Verona /Lawrence	SWRO	JW	Site Visit
Concerned Party: Anonymous								
Concern Info: Caller states that IsoNova Technologies is releasing strong odor onto Hwy 39 at 9:30 a.m. [sic]								
Conclusions: I did not observe any violations during this investigation. No action is required.								
63664	10/22/2025	10/23/2025	Tall Timber	Fugitive Particulate Matter	Hollister /Taney	SWRO	BD	Phone Conversation
Concerned Party: Brad Fields								
Concern Info: Caller states that their RV is being constantly coated with dust from a service road leading to a land disturbance. Caller stated that they occasionally spray water on the road, but that it does not do enough to control the fugitive dust. [sic]								
Conclusions: CON-256 No violations of 10 CSR 10-6.170 Restriction of Emission of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed during the investigation. The facility has committed to watering the property as frequently as possible to reduce emissions.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
63665	10/22/2025	10/27/2025	Owens Corning	Odor	Joplin /Jasper	SWRO	BD	Email
Concerned Party: Anonymous								
Concern Info: Caller states that the Owens Corning facility is routinely producing a plastic burning odor. Caller states that they smell the odor when outside at their residence. Caller states that the odor produces a light headache and upset stomach if they inhale the odor too long. [sic]								
Conclusions: CON-253 No source of odor was observed during two separate perimeter surveillance observations. No further action is required, but monitoring will continue if reports persist.								
63666	10/22/2025	10/22/2025	SOS Heating & Air LLC	Hazardous Air Pollutant Release	Cassville /Barry	SWRO	BD	Memo
Concerned Party: Anonymous								
Concern Info: Call received by EER, then referred to SWRO for investigation. See MERLIN report and initial call log attached. "CALLER STATED INDIVIDUALS FROM A COMPANY IS RELEASING REFRIGERANT GASES FROM AN AIR CONDITIONING UNITS INTO THE AIR. CALLER STATED THE INDIVIDUALS ARE NOT EPA CERTIFIED. THIS FIRST STARTED LAST WEEK AND IS STILL ON GOING. CALLER STATED PEOPLE IN THE AREA ARE GETTING SICK AND THINK IT MIGHT BE FROM THE RELEASED MATERIALS." [sic]								
Conclusions: Forwarded to EPA Region 7.								
63669	10/20/2025	10/29/2025	Robbie Roberts	Open Burning	Orrick /Ray	KCRO	DS	Phone Conversation
Concerned Party: Orrick Fire Protection District								
Concern Info: Orrick Fire Chief reports responding to a gray van pulled into Robbie Roberts property and dumped some tire and light them on fire on 10/11/2025. On 10/20/2025 another fire was light on Robbie Roberts property. This fire also contained what appeared to be prohibited items in it. [sic]								
Conclusions: Since this concern appears to be promiscuous dumping and burning, no violations will be issued to Roberts at this time. If burning continues, further actions may need to be taken.								
63680	10/23/2025	10/30/2025	Buildex	Fugitive Particulate Matter Particulates	Dearborn /Platte	KCRO	DS	Other
Concerned Party: Anonymous								
Concern Info: Located at "Buildex" just south of New Market. The facility may also be called Haydite. There is a significant amount of dust and the cloud is going over the highway. The concerned party stated it is generating from the back house, where there recently was a fire. Whenever a certain product is made, they believe the dust occurs. The concerned party believes there is no filtration from the back house due to the fire. The dust is made from Haydite rock. The color is more of a maroon/tan color, and is the same color as the dust. [sic]								
Conclusions: On May 4, 2025, a welder caught the screen media on fire within the enclosure, which burned out the windows at the top. The facility was advised to close up the windows. The facility agreed to cover them with plywood until a permanent repair could be made.								
63683	10/23/2025	10/24/2025	Unknown	Odor	El Dorado Springs /Cedar	SWRO	JW	Other
Concerned Party: Elvin Hall								
Concern Info: CP stated that the property across from them has a large pile of chicken litter that was dumped yesterday and states that the smell is overwhelming. They are concerned about their health having to breath it in. This has happened multiple times. [sic]								
Conclusions: CON-263 I did not observe any violations during this investigation. No action is required.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
63684	10/23/2025	10/30/2025	Dallas County	Hazardous Air Pollutant Release	Buffalo /Dallas	SWRO	WH	Email
Concerned Party: Anonymous Concern Info: Via web form: Dallas County Courthouse Basement - gas or diesel spilled inside the building over weekend (October 18-20) and nobody made any attempt to clean up until October 21. The gas came out of a generator that had been sitting downstairs. One portion of wall removed from the building that was soaked with fuel but other parts still in the building releasing fumes. Nobody is closing the building. Somebody sprayed air freshener in the ground floor on October 21. Nothing else has been done and gas is still soaked into floor and walls in basement. [sic] Conclusions: At the time of the investigation the spill had been cleaned-up. No violation observed. An email was sent to John Crawford and Missy Darnell providing links to the following publications: Response to Small Fuel Spills - PUB0212 Hazardous Waste Management Handbook for Small Quantity Generators - PUB2174 Managing Construction and Demolition Waste - PUB2045 Facts on Open Burning Under Missouri Regulations - PUB2047								
63697	10/27/2025	10/29/2025	Zane Morris	Open Burning Open Dumps	Branson /Taney	SWRO	JW	Communication In Person
Concerned Party: Anonymous Concern Info: My concern is that they are burning and the dumping what appears to be combination of trash and wood. Which it appears as though the ash and materiel is being pushed using machines into the Roark Creek. My concern is if trash is being dumped into the Roark Creek. They are burning and dumping on the right side of the house as you are looking from the street behind the guest house. [sic] Conclusions: CON-286 I did not observe any violations during this investigation. No action is required.								
63707	10/28/2025	10/31/2025	Logan Orr	Open Burning Unpermitted Facility	Lowry City /St. Clair	SWRO	JW	Communication In Person
Concerned Party: Anonymous Concern Info: The anonymous caller states that Logan Orr is burning treated wood in a makeshift incinerator made from a retired gasoline storage tank. [sic] Conclusions: CON-301 I did not observe any violations during this investigation. No action is required.								
63727	10/22/2025	10/22/2025	First Street Development, John Knipper, Project Manager	Asbestos	St. Joseph /Buchanan	KCRO	JS	Phone Conversation
Concerned Party: Andrew Madget Concern Info: I received a call today from CP regarding three commercial demolitions in St. Joseph. I was not able to find notifications for any of them in our database. The first is located at 514 N Belt Hwy, St. Joseph, MO, which is underway at this time. He said there are 5 dump trucks present, and expects the debris to be hauled away imminently. The second is Dinky Diner located at 1329 Garfield Ave, St. Joseph, MO. The third is Stoney's Cleaners, located across the street from Dominoes, which is at 2110 Messanie. St. Joseph, MO. He said this one is about to begin and contains asbestos. CP said that the St. Joseph building department is aware of each of these demolitions, and he wishes the city would coordinate with the department before issuing demolition permits. Note - These are being entered and addressed as three separate concerns. [sic] Conclusions: Letters of Unsatisfactory Findings are being issued to JBryant Enterprises, Bear Global Construction, and First Street Development for failure to submit a demolition notification to the department prior to demolishing a regulated structure and failure to comply with the asbestos inspection requirements. While an inspection was done prior to demolition, the report did not appear to be adequately reviewed by all owners/operators involved in the project. The inspection report listed the roofing material as an assumed asbestos-containing material. No further testing was done prior to demolition, and the demolition crew appeared unaware that the roof should have been treated as asbestos-containing.

63728	10/22/2025	10/22/2025	Dinky Diner	Asbestos	St. Joseph /Buchanan	KCRO	JS	Phone Conversation
Concerned Party: Andrew Madget Concern Info: The Air Pollution Control Program received a call regarding the demolition of Dinky Diner located at 1329 Garfield Ave, St. Joseph, MO. The concerned party said that the St. Joseph building department is aware of the demolition, and he wishes the city would coordinate with the department before issuing demolition permits. [sic] Conclusions: The building at 1329 Garfield Avenue was demolished without an asbestos inspection being performed and without an Asbestos NESHAP demolition notification being submitted. A letter of Unsatisfactory Findings is being issued to Doug Rose for these violations. Most of the demolition debris has already been disposed of; however, Rose will be required to inspect the material remaining. Rose will also be required to retroactively submit the demolition notification and pay the notification fee.								
63730	10/22/2025	10/22/2025	Stonie's Cleaners	Asbestos	St. Joseph /Buchanan	KCRO	JS	Phone Conversation
Concerned Party: Andrew Madget Concern Info: I received a call today from Andrew Madget regarding three commercial demolitions in St. Joseph. I was not able to find notifications for any of them in our database. The first is located at 514 N Belt Hwy, St. Joseph, MO, which is underway at this time. He said there are 5 dump trucks present, and expects the debris to be hauled away imminently. The second is Dinky Diner located at 1329 Garfield Ave, St. Joseph, MO. The third is Stonie's Cleaners, located across the street from Dominoes, which is at 2110 Messanie. St. Joseph, MO. He said this one is about to begin and contains asbestos. Mr. Madget said that the St. Joseph building department is aware of each of these demolitions, and he wishes the city would coordinate with the department before issuing demolition permits. Note - These are being entered and addressed as three separate concerns. Also, 2110 Messanie was later corrected to 2109 Messanie. [sic] Conclusions: Demolition had not yet begun on this building at the time of investigation. Compliance assistance was provided to the demolition contractor on the asbestos inspection and demolition notification requirements.								
63732	10/29/2025	11/06/2025	Niangua PWS	Bacteria in Water Odor	Niangua /Webster	SWRO	JO	Phone Conversation
Concerned Party: Debbie Lynn Concern Info: Terris 573-341-2100, Ext 101, Tim 417-473-6449 Smell from the water like a wet dog smell. Worried about the water quality. Wants the water tested. Please call concern party before going out to ensure they will be home. They do have an outside spigot. [sic] Conclusions: CON-309 The water is bacteriologically safe with a high amount of chlorine. Signs of iron present. Did not notice a "wet dog" smell.

63735	10/29/2025	10/31/2025	Daniel Ma	Open Burning Open Dumps	Hickory	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: SW corner of 54 & 83 intersection is the original property 37.933791, -93.403432 is the current dump site There is a turn off from the highway across from the dump site at 37.933314, -93.402128 Two men identified me as a DNR employee while I was having lunch in Weableau on Wednesday, Oct. 29. They asked me if I knew any updates on a home demolition in Wheatland. I told them I did not. The men told me about a home that was demolished in Wheatland on the SW corner of the 54 & 83 intersection across from Casey's. The said the property owner was going to burn it, but a DNR person showed up and spoke with the property owner. The men told the the fire department was advised to extinguish the fire if the property owner ignored DNR's instructions. The property owner transported the demolished home debris South of town on 83 outside city limits, and they think the property owner is going to try to burn it at this location. The site is on the West side of the highway across from the Wheatland Lake Lucas North of the cell tower. I spoke with Jackson and Bailey about the initial visit, and they remembered the incident. I showed them pictures I had taken, and they told me to write it up as a concern. I could not find the initial concern related to the demolished house. They might know the property owner's name and contact info. [sic] Conclusions: CON-312 I did not observe any violations during this investigation. No action is required.								
63736	10/29/2025	11/04/2025	Mason-Woodard Mortuary & Crematory	Opacity	Joplin Jasper	SWRO	BD	Site Visit
Concerned Party: Terry Semler Concern Info: Thick black smoke coming from the crematory at the facility. Crossing road and drifting through neighborhood. [sic] Conclusions: CON-313 The facility has contacted the incinerator manufacturer who is sending a repairman to address temperature issues with the incinerator, which was contributing to opacity issues with the unit. No further action is required.								
63737	10/30/2025	10/31/2025	Satnman Singh	Open Dumps Open Burning	Carthage Jasper	SWRO	JW	Communication In Person LOW, RTC
Concerned Party: Molly Starkey Concern Info: OA concern email states the following: "Unpermitted solid waste disposal at a commercial business. Some of the waste has been burned, other waste is simply discarded into an excavated area. Observed waste included tires, oil jugs, oil buckets, pallets, cardboard boxes, and plastic gallon jugs. I have pictures from my site visit if it would help whomever investigates this one." [sic] Conclusions: CON-318 I observed evidence of illegal open burning of around 5 cubic yards of trade waste associated with the 5911 Dhaba trucking business, including but not limited to cardboard, milk jugs, food cans, and potentially antifreeze. I also observed illegal disposal of no more than 15 cubic yards of cardboard, milk jugs, and empty antifreeze containers. These violations constitute a Group 2 violation so a Letter of Warning will be issued to the property owner. This letter will require proof of proper disposal of the burned and unburned trade waste dumped on the north side of the property. The property owner will no longer conduct open burning activities on this property. As of December 17, 2025, the department received a sufficient response to the required actions of the November 12, 2025, Letter of Warning report. The property owner cleaned up the dumped solid waste and has stopped illegally open burning. A CSU will be issued to finalize the return to compliance.

Concern Info: Submitted at 8:17 pm Saturday, November 1, 2025.								
Experienced Odor Date and Time: Nov 1, 2025 8:00 am								
Experienced Odor Duration: Currently experiencing the odor								
Experienced Odor Description: Acrid, Rancid or Rotten, Sewer								
Experienced Odor Intensity: Mild								
Experienced Odor Address and/or Location Description: 8909 East Thompson Avenue, Independence Missouri Outside my home [sic]								
Conclusions: Odor described as a mild sewer odor; sewer odors may be elevated due to colder outside temperatures. Concern was referred to the City of Independence, who agreed to check out the area and make sure there is not an issue.								
63805	11/05/2025	11/12/2025	Vnda Williams	Open Burning Open Dumps	Mansfield /Wright	SWRO	JW	Phone Conversation LOW, RTC
Concerned Party: Natasha Bailey								
Concern Info: CP states that the home located at 490 Highway B, Mansfield, has been burning tires and other petroleum products, added that they heard an explosion followed by large amounts of black smoke the morning of 11/5/2025. CP states that the RP has large amounts of trash stored and that the trash has traveled down a ravine and into a wet weather creek. [sic]								
Conclusions: CON-354 I observed evidence of illegal open burning and illegal disposal of burned materials composing no more than five cubic yards on the property. These violations will be resolved by proper disposal of the burned durable goods as described in the Letter of Warning report issued to the property owner. Sam Hunsucker, the son of Vnda Williams, sent me photos of the cleanup on December 31, 2025. Hunsucker also texted my work cell a copy of the landfill receipts related to the disposed waste. No more burning has occurred since my site visit. No further action is required.

63811	11/07/2025	11/14/2025	Ed Uhlman	Open Burning Open Dumps: Construction and Demolition	Springfield /Greene	SWRO	JW	Phone Conversation
Concerned Party: Johnny Brixley Concern Info: W. Washita St, S. Western Ave, W. Camelot St, and S. Moore Rd Property owner owns several rental house. When owner cleans out rental houses, they bring debris and trash to the GPS coordinates to burn. Owner was burning on the night of November 6. Many neighbors are very upset. Anderson told me this has happened before, and apparently the owner has been issued a violation in the past. Anderson received this information from a 911 call last night from a resident. [sic] Conclusions: CON-373 I did not observe any violations during this investigation. No action is required.								
63816	11/05/2025	11/26/2025	Buildex	Fugitive Particulate Matter	Dearborn /Platte	KCRO	DS	Other
Concerned Party: Anonymous Concern Info: Concerned party reports that there has been constant dust from Buildex throughout the day and it has been worse the last three days. States that the dust is coming all the way across town to the north side of New Market. Concerned party states that the dust is sandy and tan colored. States that the sandy dust collects on vehicle windshields and causes scratching when the wipers are used. Also states that there have been a couple of fires at the business location. [sic] Conclusions: During an inspection on October 30, 2025, the department found that a fire occurred in the headhouse resulting in the loss of windows, allowing fugitive particulate matter to escape the enclosure. During the inspection, the facility stated they would install temporary coverings, such as plywood, over the openings to prevent fugitive emissions. Once insurance was processed, windows would be reinstalled. After receiving this concern, the facility was contacted for a progress update. Buildex is working on covering up the openings with 20-mil plastic. The facility was informed that work needs to be completed expeditiously in order to prevent violations.								
63818	11/06/2025		MJ's Mini Mart	Asbestos	Gravois Mills /Morgan	SWRO	JW	Communication In Person
Concerned Party: Jeff Concern Info: "I received an environmental concern from a citizen named Jeff (660-473-9166) who is comfortable with his name being connected with the concern. Jeff was informed that the owners of the gas station located at 411 Washburn Rd, Gravois Mills, MO 65037, are currently doing a renovation on the structure. Jeff is concerned that they have not had an asbestos inspection. I have informed Jeff that there could have been an asbestos inspection conducted at the structure. Please feel free to call Jeff if you have any questions. Jeff would like to be informed if you find anything. I checked the notification databases and I could not find a notification for this address." [sic] Conclusions: CON-376 I did not observe any violations during this investigation. No action is required.

63825	11/06/2025	11/06/2025	Sharp Properties	Other	St. Ann /St. Louis	SLRO	RA	
Concerned Party: Anonymous Concern Info: We received an indoor air concern from the DNR website. The CP states: I just moved out but my bf still stays in the apartment. Carbon monoxide detector has been going off. Improper H-vac system mold and black mold in the air and furnace. Black soot where smoke detectors were. One disappeared. Headaches confusion sick feeling and we passed out when we come home. Odd odors. Can't get a thermostat replaced asked 3 times now. Black mold in bathroom, floors are soft in the kitchen and the fridge is leaking I pulled it out from the wall and black mold and nasty back of fridge. Colonial Apartments. I'm in 4127 Geraldine Ave. Apt 12. Some one really needs to check things out. Concerned about the elderly. Told we couldn't smoke inside but all the other residents do. Our health has only declined since we moved in. Neighbors two doors down do work in their apartment overnight and I hear people over our unit by the air conditioner units. Only over night but it's not employees. [sic] Conclusions: DNR does not regulate indoor air. I referred the concern to St. Louis County Department of Public Health.								
63832	10/10/2025	10/16/2025	Winland Foods	Other	St. Louis /St. Louis City	SLRO	JC	
Concerned Party: Anonymous Concern Info: We received an anonymous environmental concern from the DNR website. The CP states: It looked like there were excessive emissions from the building. The building is near the river. [sic] Conclusions: 10/14/25-RLA- I looked up the address and it is the same address as American Italian Pasta Co (510-2433). This facility has an intermediate permit. 10/16/2025-JMC- I arrived at the facility at approximately 10:20 AM. I drove around the facility, and did not notice any opacity or fugitive dust in the area. I parked in a lot to the northwest for roughly 10 minutes. I observed one steam emission point. I did not detect any odors. I entered the property and spoke with a plant operation manager. He informed me that the facility was fumigated the previous weekend. The plant periodically fumigates its flour silos as a preventative action for bugs. To do this, they clean out the flour silos and tent the area. The prep for the fumigation occurred on Friday, when the CP submitted the concern.								
63834	10/20/2025	10/22/2025		Odor		SLRO	JC	
/St. Louis City Concerned Party: Anonymous Concern Info: We received an anonymous odor concern from the DNR website. The CP is experiencing a general smell of rotten eggs when walking outside, stronger in the morning than in the afternoon/evening. Multiple days over the last week or so. [sic] Conclusions: 10-22-2025-JMC- I arrived in the area at 7:30 AM. I began at the intersection of Tower Grove Ave. and Casteman Ave., and drove east with my windows down. I did not detect an odor. I then parked near 4128 Castleman Ave. and exited the vehicle. I walked East roughly 100 feet before turning around. I did not detect a rotten egg odor.

63836	10/22/2025	10/22/2025	Laundry Mat	Odor	/St. Louis	SLRO	RA	
Concerned Party: Cindy Meredith Concern Info: We received an odor concern about a laundry mat through our dnr email. The CP states: Hi – I need help getting a laundry matt to properly vent their air dryers. The carcinogens are emitted into my backyard and getting worse because they never clean those vents. I've been round and round with the City of Maplewood for YEARS and nothing has been done. The after the fact, put in some by-laws or something of the sort, but it can't help me get this straightened out. It's a huge, long story and before I get into it, I'd like to know if you can help. I have, numerous times reported it to St. Louis County and they have tested, but it's ALWAYS during the week when the majority of smells are emitted on weekend (when those types of places are more busy) however, because they do NOT UPKEEP anything about their business, the smells are getting more frequent, no matter what time of day. Plus, the equipment they use is so antiquated, it's ridiculous! One can smell it without a 120 year old piece of equipment, that does zero. Thank you for your response and advice on what I can possibly do. I am at my wits end! Cindy Meredith 314.781.4040 h/o 314.630.0096 c [sic] Conclusions: The facility is within St. Louis County, referred to St. Louis County Department of Health APCP.								
63842	10/20/2025	10/24/2025	Former Francis Howell School District	Fugitive Particulate Matter	St. Charles /St. Charles	SLRO	MC	
Concerned Party: Michelle Watkins Concern Info: We recieved a concern from the St. Charles County Division of Environmental Health and Protection. They have received a complaint regarding Air quality on a recent demolition on a commercial site. The description is Two story former high school building- roughly 85,000 sqft. Former Francis Howell Union. AKA 1405 Hwy D. 7001 HIGHWAY 94 ST CHARLES MO 63304. There are kids going to school and having to breath in the stirred-up construction dust. [sic] Conclusions: MSC 10/24/2025: The site is the previous location of an asbestos abatement and later demolition project. Demolition is complete, there is no structure remaining on site. A site visit was made from 11:50am - 12:50pm. All activity consisted of leveling with excavators, hauling the rock with dump trucks. On site there were three piles of scrap metal. On-site activities did kick up dust, but none of it left the property boundary. I followed-up with Michelle Watkins with the provided e-mail and gave her a summary of investigation.

63843	09/26/2025	10/23/2025	Curtis Collins and his paramour's father	Hazardous Air Pollutant Release	Arnold /Jefferson	SLRO	JC	
Concerned Party: Jerry Faries Concern Info: While speaking to Jerry Faries about a concern alleging that automotive fluids were being continuously spilled on the ground and that they were migrating into an adjoining green space, he mentioned that diesel trucks were left to idle on the property. Faries and other individuals in the condominiums had called multiple times to state that Curtis Collins was leaking automotive fluids on the ground daily. During my closing communication with Faries, he stated that Collins' paramour's father, as well as Collins, were leaving their diesel trucks idling for longer than 5 minutes in the development and that it was causing health issues. I then referenced APC staff to find the regulatory applicability. I had finished my investigation by waiting by Collins' truck at 10:30 AM to catch him before he went to work. Collins had been avoiding contact with me. We had a 20 min. conversation on how to clean up automotive fluids when spilled, why it wasn't acceptable to leak fluids regularly, the danger to the surrounding green space and ended with me suggesting that the vehicle would fail if used fluids were continuously leaking out. During my conversation with Collins and his paramour, I was informed that Collins had a stroke that left him with some struggles with his communication. He could formulate many words, but some words would not come out. I reached back out to Faries to find out what size Collins' truck was (the pictures that I took during my investigation did not show the GVWR of the truck). Air regulations stated that trucks above a 10,000 lb. GVWR were captured by the regulatory requirements of less than 5 min of idling. I was then asked to submit this concern to Robert Andrews (APC Supervisor). [sic] Conclusions: 10-3-2025-JMC- I arrived at 1216 River Chase Dr. at 12:00 PM. I rang the doorbell, but no one answered. I drove around the condominium complex and did not see a truck that matched the CP's description. I also did not see a truck that was left idling.								
63844	10/14/2025	10/21/2025	church	Asbestos	Crystal City /Jefferson	SLRO	MC	
Concerned Party: Anonymous Concern Info: We received an anonymous asbestos concern from the DNR website. The CP states: First Baptist Church Festus-Crystal City has known about the asbestos in the basement tiles and likely other things for a while. Tiles were previously replaced before anyone knew, sometime in the last 10 years. This issue was brought up to the maintenance man who worked there until September 2, 2025. He stated a licensed company would need to be hired to do the work, as he cannot do it. Samples were taken by a flooring personnel to verify. However, the maintenance man left employment of the company shortly after. Now we have learned a volunteer is taking on this work. Executive pastor has been notified of the issue but is proceeding anyway. This is going to put the whole congregation at risk. [sic] Conclusions: 10/14/25-RLA- I checked our records and we have not had any asbestos notifications come in from Crystal City in the past two years. MSC 10/21/2025: I visited the property at the SoC address. I was directed to the office. No one was available in the church office. I left contact information. I viewed the entire perimeter of the site and saw no evidence of construction or demolition activities (dumpster containing construction material, equipment, workers). MSC 10/24/2025: I called and left a voice mail with the church office asking if they could reach out. MSC 10/27/2025: The site representative, Kathleen, stated that there was no renovation occurring on site and that she confirmed this with the pastor. I stated that if we received further concerns, we would continue to investigate the site. I explained that the concern involved asbestos from the basement area and any further concerns will continue to be investigated.

63845	10/27/2025	10/27/2025	Eric Dearduff	Open Burning		SLRO	JC	
/Jefferson								
Concerned Party: Anonymous								
Concern Info: I am a concerned neighbor of this problem which has been going on for several years, the property at 4203 E. FOUR RIDGE RD IMPERIAL MO has a burn pile (approx. 20 feet in dia.) A business owner (Eric Dearduff) who redoes flooring, walls, siding and related building products dumps his waste building materials at said residence and then lights the pile on fire. The smoke will choke you as it does me! I am concerned about any health issues as I always start coughing for a few days after breathing what I call TOXIC smoke! I have reached out to several agencies in the county with no avail. It would be very much appreciated if someone would make sure this is not a health issue for the neighborhood. Also I do not believe he lives there, he uses the property as his dump site. [sic]								
Conclusions: 10/27/2025-JMC- I performed a site visit. I arrived at the property at 3:45 PM. I saw the burn pile (See photo attachment) from the gravel road. The pile was smoldering but was not actively burning. I walked to the house and the garage, but I did not see anyone on the property. I was able to see the burn pile from the roadway. I was unable to determine all the contents of the pile. I saw a few buckets, some treated wood, and vinyl siding in the burnt ashes. Half of the pile also had unburned cardboard boxes, plastic, and treated wood. 10-28-2025-JMC- I called Dearduff to discuss my investigation. I asked Dearduff for the contents of the fire, and he informed me that it consisted of flooring, cabinets, cardboard, and shingles. I explained to him that all the listed materials are prohibited from open burning under 10 CSR 10-6.045 "Open Burning Requirements." The RP stated he was unaware that the practice was illegal. He agreed to clean up the remaining materials and dispose of future demolition waste through a dumpster service.

63856	10/22/2025	10/23/2025	Residential	Open Burning	Barnhart /Jefferson	SLRO	GH	
Concerned Party: Assistant Chief Bobby Chrisco Concern Info: We received an open burning concern from an email addressed to the DNR. The CP states: Dear Missouri DNR, My name is Bobby Chrisco and I serve as the Assistant Chief of Antonia Fire District, located in Barnhart, Missouri. We have responded to multiple fire incidents at the same residential address: 1638 Little Bend Road, Barnhart, Mo 63012. The structure has been officially condemned and deemed unsafe and uninhabitable. Despite this, the property owner continues to ignite materials outside the structure. These unauthorized burns have raised ongoing safety, environmental, and public health concerns for our department and the surrounding community. Given the repeated nature of these incidents and the condition of the property, I'm reaching out to ask if the Missouri Department of Natural Resources can assist in addressing this issue or take enforcement action to prevent further illegal burning. Please let me know what information or documentation you may need from our department to support any potential investigation or action on your end. 2025 list of responses to the above address: 1. 6-27 Structure Fire 2. 6-28 Illegal Burn 3. 9-10 Illegal Burn 4. 9-26 Structure Fire 5. 9-29 Brush Fire 6. 10-14 Illegal Burn 7. 10-21 Illegal Burn Thank you for your time and assistance. Bobby Chrisco Assistant Chief Antonia Fire District 636-948-4433 [sic] Conclusions: I visited the site and no open burning was being conducted. The residential building and debris had been thoroughly burnt. I issued a Letter of Warning based off the fire reports that I received from the Fire Department.

63857	11/12/2025	11/18/2025	Raymond Pendleton	Open Burning	Easton /Buchanan	KCRO	DS	Phone Conversation
Concerned Party: Nicole Salmond Concern Info: Caller has been dealing with a neighbor burning late at night. They are not sure what they are burning but whatever they are burning is causing headaches and causing them to use their inhaler more often. This has been going on for a month now. They have been in contact with the sheriff and fire department. The sheriff has come out on multiple occasions when the smoke has dissipated and has found nothing wrong because they are only burning pallets. The fire department has stated that a Jefferson City DNR employee has been out. The caller would like to know if that is true. The caller also has heard that this neighbor has been in trouble with DNR in the past for burning copper. The caller does not know the address of the concern, but it is south of the caller's property with a trailer. The only trailer around. The caller would like a call back on the status of the concern. [sic] Conclusions: Raymond Pendleton never submitted waivers from the neighbors within 200 yards after the previous investigation in 2021. During this investigation, Pendleton admitted to still occasionally burning pallets. Pendleton was advised to obtain signed waivers from the neighbors within 200 yards. Pendleton stated that he obtained the waivers, but after multiple attempts, the department has not received them. A report with Unsatisfactory Findings will be issued for burning untreated wood waste within 200 yards from the nearest structure not owned by the party conducting the burning.								
63867	10/16/2025	10/16/2025	BMC Stone	Fugitive Particulate Matter	Defiance /St. Charles	SLRO	JC	
Concerned Party: Cassandra Kristin Ward Concern Info: We received a dust concern from the EPA. The CP states: I am submitting a complaint regarding ongoing dust pollution from the quarry. Over the past several months, there has been heavy dust generated by the quarry's operations that drifts onto nearby homes and properties. The dust frequently coats vehicles, outdoor furniture, and vegetation, and causes visible haze across the area. It appears to be most severe during dry weather and active hauling or crushing periods. This has become both an environmental and health concern. The persistent dust has begun to affect my husband, my son, and myself, causing chronic coughing, sinus irritation, and respiratory discomfort. The air quality around our home has noticeably declined, and we are increasingly concerned about the long-term health effects of this exposure. Additionally, I was informed by a quarry employee that when the property was recently sold, there was discussion that the new or former owners might have to shut down operations due to the need for a dust mitigation system, which would have been too costly to install. If accurate, this suggests that the operators may already be aware of noncompliance or the lack of adequate dust control measures. I respectfully request that the EPA investigate whether the quarry is complying with all applicable air quality and dust-control regulations, and take appropriate action to ensure compliance and mitigation. Observed issues: Airborne dust clouds, accumulation on property, reduced visibility, and respiratory irritation Supporting Evidence: I have included photos and video documenting the extent of the dust drifting from the quarry and settling on nearby property. I would be happy for you to come to our home to see first hand the pollution. A link to these materials is provided below: https://share.icloud.com/photos/04eec1gUYUdFm5cy9q9VjHfbQ Thank you for your attention to this matter and for protecting the health and environment of our community. [sic] Conclusions: A site investigation was conducted on 10/15/25 and dust violations were identified. BMC Stone will be issued a LOW.								
63875	11/12/2025	11/19/2025	AFB International	Odor	Aurora /Lawrence	SWRO	JW	Communication In Person

63891	11/13/2025	11/14/2025	Martin Marietta Materials - Randolph Mine sean.hovorka@martinmarietta.com	Fugitive Particulate Matter	Randolph /Clay	KCRO	JS	Other
Concerned Party: Anonymous Concern Info: Concerned party called about the dust coming from Martin Marietta's Randolph mine at 210 Highway. They are camping at Worlds of Fun Campgrounds and cannot sit outside because it is so dusty. [sic] Conclusions: While some dust was observed on 210 Highway, it did not appear to be going further than the highway, and it could not be confirmed a short time later. The facility took corrective action on some minor dust sources I observed and agreed to monitor dust more closely. No violations were observed during the investigation.

63893	11/13/2025	11/20/2025	Clayton Locke	Other	Stockton /Cedar	SWRO	BD	Communication In Person
Concerned Party: Todd Williams Concern Info: Caller states that a feed lot to the west/southwest of his residence has been burning large amounts of cattle manure for approximately the last 3 months. The burning occurs at least twice a week and smolders all day long, is in an open burn pile and sends particulate into the air that float onto his property. The feed lot was originally running 500 head of cattle, but the caller states he believes the operation has since quadrupled in size to 2000 plus head. [sic] Conclusions: CON-408 No violations were observed during the investigation. The farm is not purposefully burning manure and composts as the disposal method for manure. No further action is required.								
63896	11/13/2025	11/14/2025	IsoNova Technologies-Tucker Edmondson	Odor	Verona /Lawrence	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Anonymous caller states that IsoNova Technologies is releasing significant odor in the afternoon of November 13, 2025. The caller alleges that the facility is not using its RTO to control odors. [sic] Conclusions: CON-414 I did not observe any violations during this investigation. No action is required.								
63900	11/14/2025	11/14/2025	Chris Ingram, Casey Flinn, owner	Other	Maysville /DeKalb	KCRO	CS	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 10:25 am Friday, November 14, 2025 - Date of Incident or First Noticed: November 14, 2025 A construction company in Maysville called FS Excavating is running dyed diesel in all their over the road trucks, whether it's their semi's or in their Dodge Ram company trucks, all over the road highway trucks. [sic] Conclusions: Referred to Missouri Department of Revenue for enforcement.								
63909	10/17/2025	10/21/2025	Bluebird Composting	Odor	Fulton /Callaway	NERO	DB	Report
Concerned Party: Anonymous Concern Info: Online report: "I live within about a mile of Bluebird Compost and the smell has been getting progressively worse. In years past, it used to just be every now and then, but the last couple of months it has been a daily pervasive smell that makes me feel like I live in the center of a dump." [sic] Conclusions: Violation of odor rule, issuing UFRR. Weather conditions 61F, winds W 20 mph, 41% humidity. On arrival at 1405, I estimated 4:1 DT along the road. I pulled into a driveway at 4720 HH directly east of the compost area and began testing with the nasal ranger. At 1415 I found odors at 7:1 DT. I departed and got lunch. I returned and found odors variable and at 1459 I noted 7:1 DT again, and a third time at 1515. A neighbor walked up and I discussed the concern with him. He said today is bearable and sometimes it is knock you down strong. I spoke with Rana Bains by phone and discussed the concern and findings with him. He said they are not turning, but are moving piles. I informed him a warning would be issued for high odors and he said he would add more carbon, maybe an extra 20-30%. I recommended he also consider addressing standing water.

63913	11/17/2025	12/03/2025	Unknown	Stormwater Contamination	Harrisonville /Cass	KCRO	HM	Phone Conversation
Concerned Party: Richard Hurt Concern Info: I live directly next to this business and I first realized how bad this company is poisoning the atmosphere was when they blocked the natural runoff for weather. There was a question regarding my retention pond and they blocked the natural waterway. In return, this backed up water from their side with all the equipment. I went outside and I had 10 dead turtles and other animals that died due to chemical releasing from this business. I am on the uphill side so I'm certain this company has poisoned a lot of our surrounding farm land. Please hold this company responsible for their actions. They have stated at other meetings we've had that they don't care because they don't live there. Please stop the poisoning of our ground and air. [sic] Conclusions: The death of the aquatic organisms happened many months ago and occurred in a private pond. Provided information to the concerned party. No further action needed.								
63914	11/17/2025	11/21/2025	Eddie Piercall	Open Burning	Independence /Jackson	KCRO	CK	Phone Conversation LOW, RTC
Concerned Party: Laura Ferguson Concern Info: Via KCRO inbox - Sent: Monday, November 17, 2025 9:24 AM To: KCRO Subject: 1901 N Grove Drive Independence Missouri 64058 Good morning, I have been advised to reach out to DNR by Fort Osage Fire Chief. My neighbor at 1901 N Grove Drive, Eddie Piercall, burns something every day. My neighbor is constantly burning things and it got out of control this past Friday night, 11/14/2025. The fire was inches from catching the fence on fire at 1903 N Grove Drive. Thank God it didn't. We did notice a lot of ash, burnt leaves on the deck at 1903 N Grove Drive. Along with burnt leaves on the ground at 1903 N Grove Drive in the backyard. There is a tree that we want to know if it should be removed because it looks like it has some fire damage. The tree is close to the fence on the North side of the property of 1901 close to the shed that was on fire. I am sending you quite a few separate videos from our blink camera that also has sound. At one point you can see Eddie Piercall put an entire wheel and tire on the fire. He burns things he is not supposed to. I also question whether he is burning things that he has stolen. He brings trailers full of junk back every day or two. He also tries to block the view of the camera so we cannot see what he is burning. He uses tarps, mattresses, etc. Here are videos of most of the evening. I have been trying to get something done with this situation. This fire was not a vegetation fire. Eddie Piercall does not pay attention to the fires when he burns. He also burns things in the creek behind us and also puts things in coolers to burn. I do have saved footage from previous burnings. We need some guidance on this. We have been trying to get something done for over a year and a half. I have asthma and COPD. We cannot sit on our back deck because the smell is so bad. It burns our eyes and lungs. My neighbor has a seventeen month old. We cannot play outside or be in the yard. Thank you for your time and help. I will be sending separate emails with videos in a few minutes. [sic] Conclusions: Eddie Pierceall was found to be out of compliance with the 10 CSR 10-6.045, Open Burning Requirements. The Fort Osage Fire Protection Service issued a fire report for September 11, 2025, response incident, which confirmed that durable goods were being burned on site at the 901 Grove Road, Independence address. Letter of Warning issued.

63917	11/17/2025	11/18/2025	Advanced Metals (Mark Merritt)	Open Burning Odor	Lamar /Vernon	SWRO	JW	Email RNOV
Concerned Party: Anonymous Concern Info: EER Incident 251116-1255-LDH summary: "A caller to the spill line was complaining about their neighbor burning some automotive waste and air quality at his home. The caller was upset to a degree that we were not going to respond immediately nor was the local fire department interested in investigating/responding either. This caller was provided with SWRO's number in the event that you all may be able to help. He also reported this to the NRC with additional info and key words that escalate the issue. The caller never originally was concerned about release into a creek nor did they say they were feeling bad from the smoke. The originally explained that it smelled bad and their neighbor would not stop burning this weekend." [sic] Conclusions: CON-442 During the investigation we observed evidence of illegal dumping of at least 2000 cubic yards of ASR waste, which is a violation of RSMo 260.210. Some of the ASR was burning at the dumping site, which is a violation of 10 CSR 10-6.045. Fugitive dust was observed at the 2003 State Hwy KK facility in Lamar, which is a violation of 10 CSR 10-6.170. Based on all these violations, a RNOV is being sent to Advanced Metals for the illegal dumping and to the property owners for illegal burning. Advanced Metals is required (and has been required) to dispose of all ASR to permitted landfills. Advanced Metals is expected to clean up all of the dumped ASR and to send the department receipts proving that all other loads of ASR have been sent to landfills. This was one concern - RNOV SW250105 was issued to Brantlee and Brooke Gotschall the property owners.								
63918	11/17/2025	11/21/2025	C&L Grease	Odor	Joplin /Jasper	SWRO	JW	Site Visit
Concerned Party: Jessica Wagner Concern Info: "I am writing this to report that we have been having a smell that smells like sewage in the area of CARTERVILLE,MO. I have asthma and I am seeing a Doctor Monday and I will be letting them know that Because of this smell I have had stomach problems with eating or drinking, I have also got problems with my asthma getting worse. When I smelled the sewage smell it made my lungs hurt so bad that I had pain shooting through my lungs. Believe me I will be telling the Doctors all about it. I need you guys to do something about this because it's ridiculous that my child can't play outside because of the smell. I am 100% sure that is is coming from Larry Wald and his company here in Carterville. His business is called Wald Septic Service and all these houses were here long before his business and he should not have built it thier. The smell is so bad that We can smell it into Webb City and in some parts of Carthage now. I expect you guys to not brush this off and deal with this." [sic] Conclusions: CON-446 I did not observe any violations during this investigation. No action is required.								
63921	10/10/2025	10/21/2025	Coopers Landing	Asbestos	Columbia /Boone	NERO	DB	Report UF
Concerned Party: Anonymous Concern Info: The asbestos unit came across some news articles today about the demolition/renovation of Cooper's Landing located at 11505 Smith Hatchery Rd, Columbia, MO 65203. Apparently, they began demolition on October 7, 2025. In one of the videos, I saw Sunderland Trucking's name on the side of a dump truck. I will place the news articles below. I did check our systems and we did not receive a demolition notification or asbestos abatement notification. The waste from the demolish might be gone already since one of the news articles says they have started building the new building. However, there is reference to future renovations. [sic] Conclusions: At the site I observed the building had been fully demolished and the ground was being prepared for new construction. I spoke with a Coopers Landing employee and he suggested I send an email to the address on the website. I left a card with him and the next day I emailed a contact request to Coopers Landing. On October 28, I spoke with Richard King by phone. He said the demolition was done two weeks ago and the builders and demo guy hadn't informed him of any asbestos issues. Stated it was a metal building on a concrete pad that was built in the 80's and that it had been damaged so the county wasn't allowing people to use it. He said the first demolition contractor had gone dark on him so he picked another guy to do it.

Concerned Party: Glenda Darden Concern Info: Overpowering odor was observed near the Mount Hope Cemetery near on Rangeline Road, Webb City at around 3:00 p.m., November 16, 2025. The concerned party (CP) said the odor smelled like untreated sewage. They believe the odor was being carried from the Carterville area to the east. [sic] Conclusions: CON-451 I did not observe any violations during this investigation. No action is required.								
63934	11/17/2025	11/17/2025	Ingels	Open Dumps Open Burning	Pleasant Hill /Cass	KCRO	MU	Email
Concerned Party: Liz Concern Info: Via Webform email - Submitted at 2:43 pm Monday, November 17, 2025 - Date of Incident or First Noticed: 01/06/2023 Formal Complaint Regarding Illegal Scrap Tire Dumping and Public Health Hazards at Property 19019 S State Rte 291, Pleasant Hill, MO 64080 To Whom It May Concern: I am writing to file a formal complaint regarding a property located near 291 Highway that appears to be intentionally and repeatedly violating scrap tire management laws. The site is being used as an unpermitted dumping ground, with thousands of scrap tires visibly stored in open areas. This situation has created several urgent health and environmental hazards: Mosquito Breeding Grounds: Scrap tires collecting water have created significant mosquito-breeding sites, raising concerns about the spread of mosquito-borne illnesses. Air Quality and Fire Risk: The location has a history of tire fires, requiring past intervention from the fire department. Burning tires release highly toxic smoke and degrade air quality for nearby residents. Illegal Dumping / Unpermitted Facility: Based on the scale and condition of the site, it is functioning as an unpermitted scrap tire dump, in apparent violation of state scrap tire management laws and local solid-waste regulations. Given the public health risks, environmental concerns, and potential fire hazards, I respectfully request that your office investigate this location as soon as possible and take any appropriate enforcement action. I am willing to provide additional information, photographs, or clarification if needed. Thank you for your attention to this matter. [sic] Conclusions: Facility in enforcement.

63936	11/14/2025	11/14/2025	Pea Ridge Mine/Caldera Holdings	Other	/Washington	SERO	OR	Site Visit
Concerned Party: Aaron Thierath Concern Info: rec'd via email - cp states: My question is I see hillsides and trees being cleared at peak ridge mine of hwy EE , I am aware they have a licensing agreement with ORNL for the extraction process to obtain the ree's from the tailings ponds , my question is if they already are or if they decide it is beneficial to extract on a large scale and they decide it's most cost beneficial to truck the material out of the mine and to a facility to be extracted who going to be monitoring the air the ground water the surface water the wells for destabilization of the contaminants or how with they be contained so they don't contaminate the ground water the air and the surface water? Because as I read that caldera holdings was fined as recently as last year for contaminating tributaries of the meramac river with a measly 10k fine which they didn't have to pay if they did something I don't recall what that was but this needs to be addressed before tandem axle dumps and large earth movers start kicking up dust and spreading it all down hwy EE and 185 and the wind blows it all right into woodland lakes . I look forward to your response thank you [sic] Conclusions: Upon receiving the concern, I conducted a drive-by of the site on Friday, November 14th. The gate at the facility entrance was closed and locked, preventing access to site to make contact. From Highway EE near Mine Road, no one appeared to be on site and I did not observe any mining activities occurring. It appeared that a brush fire had occurred on the west side of the facility near Highway EE but no smoke was present. Additionally, I did not see any dust leaving the property from my vantage point. Regarding the cleared trees, I assisted the property owner with obtaining a land disturbance permit in March of 2024 when I did their most recent inspection. From what I could see on November 14th, I did not observe any runoff concerns associated with the land disturbance activities since the area they are working in would ultimately drain towards their sedimentation ponds. The facility is currently in Enforcement with the department's Water Pollution Control branch and has an active AOC. On November 18, 2025, Dustin Hampton made contact with the concerned party and discussed their concerns. Jesse Evans also plans to reach out with the facility owner to set up a site visit and discuss Air Pollution regulations prior to the facility opening.								
63939	11/18/2025	11/20/2025	John and Wanda Hoover	Other	Buckner /Jackson	KCRO	JS	Phone Conversation
Concerned Party: Sandra Taylor Concern Info: I live in Jackson Co. Mo. Nov. 6 around 2 a.m. our neighbors long garage out building caught on fire. I live next to the property. My son lives with me. He has heart problems. I have serious allergy issues. We both are having headaches. Coughing up junk and sometimes trouble getting air. They have not reported the cause of the fire, but the chemical smell is heavy in the air. We need help. This needs looked into and cleaned up as soon as possible. The place where the fire was belongs to John and Wanda Hoover. An air check needs to be done. Thanks, please help. [sic] Conclusions: The cause of the garage fire could not be determined by the fire department. No violations are being issued at this time since the fire does not appear intentional. The issue of debris remaining on site has been referred to the Jackson County Codes Enforcement office.								
63941	10/21/2025	10/21/2025	Bootheel Cotton Gin	Other	Matthews /New Madrid	SERO	JE	Communication In Person
Concerned Party: James Jordan Concern Info: Big Prairie Cotton Co. emitting large amounts of dust, with wind directly out of the south at 15 miles per hour it is headed directly towards the elementary school. [sic] Conclusions: At this time, Bootheel Cotton Gin was not observed as having any opacity violations due to exceedances from the cyclones. There was also no fugitive dust violations at the time of the concern investigation as no fugitive emissions were identified to be crossing property boundaries.

64029	11/19/2025	11/20/2025	APAC Quarry and Mid-States Materials	Fugitive Particulate Matter	Bates City /Lafayette	KCRO	DS	Other
Concerned Party: Anonymous Concern Info: From Webform email: Date of Incident or Date First Noticed 11/19/2025 There are 2 gravel quarries in our rural community 30 miles from Kansas City. Even though we are far away, our AQI is the same, if not higher than IQAir readings in KC. In addition, the PM1 is currently 25 and this has been going on all morning. There is another sensor next to I-70 and also close to us and AQI is half of our AQI. There are no factories here. We have outdoor farm animals and they cannot escape to indoor clean air. The chickens and other birds cannot tolerate this. We've noticed this before (many times) and believe our air should be at least a little cleaner in the country and many miles away from I-70. We don't think they use much water in their operations so the water quality isn't affected. They can slow operations before inspection and air clears up, but it will show in water. APAC has had water issues violated but never air. Not sure if issue with slowing operation before inspections, but a surprise visit could tell if this happens. Thank you for any help for our citizens and outdoor animals. I reported a concern earlier today about two quarries next to each other near Bates City, MO (APAC and Mid-States Materials). Just want to add that I saw what is possibly a sick wild animal this morning (rabbit) that let my dog and I close to it within about 6 feet and didnt run. It stayed stationary for several minutes even though we were that close and my leashed dog was pointing and ready to attack. Hoping it is okay, we didnt touch it and it did eventually run. It was a wild rabbit, gray in color. This form doesn't seem to work on my end, my apologies if sending more than once. I will also contact wildlife agency or animal group for guidance. I do believe that dust is leaving the two quarries. [sic] Conclusions: At the time of investigation, no violations were observed at either location.								
64030	11/18/2025	11/25/2025	unknown	Open Burning Open Dumps: Construction and Demolition	Branson /Stone	SWRO	BD	Site Visit
Concerned Party: Anonymous Concern Info: Concerned party stated that a residence has burned down 2 residences within the last 2 years with the most recent being 2 months ago. Currently, CP stated that they are bring in and burning trash, plastic and rubber material, car parts, and demolition waste from a trailer homes. Cp stated that burning started in the early morning and is still currently smoldering and said that the smoke produced was dark/ black in color. CP stated that they are burning something at least 4 days a week. CP said they believe the property owner has the last name of Blevins, but they are not the ones conducting the burning. [sic] Conclusions: CON-471 Violations of 10 CSR 10-6.045 Open Burning Requirements could not be verified through the site investigation. I was unable to get in contact with any potential responsible parties. No visible burn piles were observed during the perimeter surveillance.								
64033	11/19/2025	12/05/2025	Maria Petrov	Open Burning	Springfield /Greene	SWRO	JW	Site Visit
Concerned Party: Karen Wells Concern Info: The CP states that her house and garage is constantly being smoked out by the neighbors' burning activities. The CP states that the smoke has been an ongoing issue for several years and that the Battlefield Fire Protection District cannot prevent the neighbors from starting fires. The CP does not know whether durable goods are being burned. The CP's main complaint is about smoke drifting onto her property [sic] Conclusions: CON-479 I did not observe any violations during this investigation. No action is required.

Concerned Party: Sheri Crisp Concern Info: Excessive Burning and burning at night. Email entry: "I live in a rural area so i know it's legal to burn leaves in the county. However, there's a neighbor that burns so much we are smelling the smoke in our house. I'm having to use my inhaler and my eyes are red and hurting. I called 911 to see if the Ebenezer Fire Dept could make the neighbor put out the fire. Apparently, nothing was done because it's 3:07am and i can't sleep because now i have a huge headache and the smoke is thick outside. This guy burns all the time, i can't even go outside to enjoy my property when he burns because the smoke is so bad. I've taken a photo of the smoke and i want something done about this, it's always the same guy and i'm sick of it. The fire dept has asked him to stop before so i don't know why he's still burning now at 3am. I'm not moving either, this is my home, the guy needs to stop burning so much it's affecting air quality. " Driving Directions Email - "I live at 7315 N Farm Road 145 in Springfield. The man that's burning leaves lives at the corner of Farm Road 145 and WW, right across the street from our new Ebenezer Fire Department. " [sic] Conclusions: CON-475 I did not observe any violations during this investigation. No action is required.								
64039	10/29/2025	10/30/2025	Chandler Doughten	Other	Jackson /Cape Girardeau	SERO	HC	Other
Concerned Party: Anonymous Concern Info: Received by email. CP States: Property between 1530 Woodland Dr East and 1614 Woodland Dr East is currently being used as a dump site and burn site for a commercial business. There is currently a 20'x 20' junk pile from customers and a 40' x 40' burn pile. Evidence also exists of buried material under the burn site. There are also numerous trucks, trailers, heavy equipment, rock piles, mulch and other items that the business operates on a daily basis. This is a residential neighborhood that the business is operating on daily. A creek runs between the dump and burn site. This business is in violation of Missouri TITLE XVI CONSERVATION, RESOURCES AND DEVELOPMENT LAWS - Chapter 260. [sic] Conclusions: Referred to the City of Jackson.								
64044	11/17/2025	11/21/2025	Developer/City of Raymore, Rick Scott, GM	Odor	/Cass	KCRO	DE	Email
Concerned Party: Jim Moore Concern Info: I received a concern via email chain starting from CP in regards to sewer odors in his subdivision. Below is the original email and his follow up email after I spoke with him via phone call. In summary, he believes the odor is potentially due to forcemains that dump into the manholes on his street. He stated there are four manholes and they do not have any vents. He has not noticed a trend in odors due to weather events or times, only that the smell is present 70% of the time from the area of those manholes. He stated the city of Raymore replaced the carbon filters attached the to manhole lids this morning (11/19/25) in the four manholes. If what he stated was accurate, I stated it was possible for grinder pumps to have septic sewage since they needed to meet a certain fill level before tripping and pumping which could cause strong odors. I stated I would follow up with the air unit. (Full text can be read in Power Apps. ACE has a character limit; therefore, full text could not be entered here - TJF 11/20/2025) [sic] Conclusions: City of Raymore has replaced carbon media in the manholes to reduce odor. This will be done annually going forward. The City is also looking into installing gaskets on the manhole lids. Further investigation may be needed if situation worsens.

64046	11/18/2025	11/19/2025	Unknown	Open Burning Open Dumps Used Oil	Independence /Jackson	KCRO	CS	Phone Conversation
Concerned Party: John Stolte Concern Info: From EPA form: "The occupants of this house appear to be running a scrapping operation, storing and dismantling various automotive parts, industrial equipment, household appliances, car batteries, etc., which they dismantle for scrap metal, then improperly dispose of the leftover parts. They repeatedly burn trash/waste, such as tires, plastics, etc., dump chemicals from car parts onto the street/ground, such as coolant and oil, release refrigerant from air conditioners/window units/ refrigerators into the atmosphere, and improperly dispose of other hazardous waste". [sic] Conclusions: The site has been cleaned up and is no longer in violation.								
64052	11/17/2025	11/25/2025	Xtreme Property Holdings, LLC	Fugitive Particulate Matter Land Disturbance	Nixa /Christian	SWRO	BD	
Concerned Party: Mike Miller Concern Info: Fugitive dust is leaving an active fourteen acre land disturbance site. the concerned party said the contractor is not making any effort to prevent material leaving the property. Jared Morgan Construction is the contractor at the site. A Missouri State Operating Permit (MSOP) for land disturbance activities has been issued for the site Driving Directions 1209 West Mt. Vernon Street, Nixa [sic] Conclusions: CON-453 No violations were observed at the time of the site investigation. Routine surveillance will continue if dust concerns continue to persist.								
64054	11/20/2025	11/24/2025	Phillip and Koda Swift	Open Burning	Neosho /Newton	SWRO	JW	Phone Conversation UF
Concerned Party: Kaitlyn Buchanan and Jadon Ray Concern Info: Kaitlyn Buchanan contacted the department and stated that Swift Roofing is burning a large pile of remodeling construction and demolition waste including cabinets, mattress, tables and treated woods. Buchanan stated that the ash is leaving the property and affecting her cattle and hay bales that were near the fence. Buchanan's boyfriend (Jadon Ray) attempted to speak with the contractor (Phillip Swift) but the conversation did not go well. Swift roofing owns the house being remodeled. The sheriff's office was also called, and Buchanan was provided with a case #. Driving Directions Address next to the concern party's property is at the address of 11157 Mulberry Road, Neosho, Missouri [sic] Conclusions: CON-508 During the investigation I observed evidence of illegal open burning and dumping of renovation waste. The property owner is required to cease illegal open burning and provide proof of proper disposal for the solid waste by January 17, 2026.

64055	11/20/2025	12/01/2025	unknown	Open Burning	/Greene	SWRO	BD	Memo
Concerned Party: Sheri Concern Info: On 11/18, i reported that someone was open burning near my residence and it was causing breathing difficulties. Today on 11/19, the whole inside of my house smells like burned creosote even though we have an air purifier in our house. And the whole area outside is full of smoke, this is a nuisance and i've taken photos, the smoke is very bad outside. So I called 911 again today about more smoke in the air and that it smells like creosote. The 911 dispatcher called me back to tell me the fire dept told her it was a controlled burn. Yesterday when i reported my concerns i thought the smoke was coming from a neighbor north east of us but today i can see the smoke is coming from south west of our home. I know there are many elderly people that live in this area, my mother is elderly and she's now doing a breathing treatment because of this. It isn't right for people to pollute the air like this for days at a time and cause a nuisance that can actually harm our health. The burning is too much, we can't breath or even be outside and i am outside every day. I've been couped up in the house for two days now and i have a terrible headache. Driving Directions South west of Ebenezer fire dept and our home at 7315 N Farm Road 145 outside Springfield city limits [sic] Conclusions: CON-510 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed by the Ebenezer Fire Department, and no violations were alleged by the concerned party. No further action is required.								
64056	11/17/2025	11/19/2025	Ozark Concrete Materials	Fugitive Particulate Matter	Southwest City /McDonald	SWRO	JW	Communication In Person
Concerned Party: Ethan Pendergraft Concern Info: Fugitive dust has been leaving a concrete plant for several months. Neighboring properties are becoming covered with fine, white material. The problem is ongoing. Driving Directions Across the road from 208 and 210 Co. Hwy J, Southwest City. The company website lists its location as 164 J Highway, Southwest City. The Google map shows the location to be at the junction of Highway J and Missouri Highway 43. [sic] Conclusions: CON-454 I did not observe any violations during this investigation. No action is required.								
64058	11/18/2025	11/25/2025	Capital Materials	Fugitive Particulate Matter Opacity	Ozark /Christian	SWRO	BD	Letter
Concerned Party: Lloyd Rawlings Concern Info: Caller states that Capital Materials is having excessive opacity from the conveyors which is resulting in dust leaving the quarry and coating their house and property. Driving Directions Take highway 65 south to Evans Rd. Turn right on Farmer Branch Rd and turn left at quarry. [sic] Conclusions: CON-469 No violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed during the site investigation. A full compliance inspection was conducted on 12/4/2025 and no fugitive emissions were observed during this time.								
64067	10/16/2025	10/21/2025	Chris Wllson	Open Burning	New London /Ralls	NERO	DB	UF
Concerned Party: Anonymous Concern Info: Online report states: "ISSUE IS - wilson tree service, business.....they open burn probably 300 days a year...basically everyday unless rain puts it out....trees, brush and old mulch...no incinerator....so tons of smoke.....the houses near by have to breathe smoke almost on a daily basis ..cant open doors or windows due to all the smoke.....owner has been asked to stop repeatedly.." [sic] Conclusions: Violation of open burning rule - burns business waste after dark. Issuing UFRR. At the site, I found nobody present. I left a note on the shop door. A guy showed up and provided Chris' phone number. I called him and discussed the concern with him. He said he burns brush and wood waste with county permission there for the last 10ish years and he has a camera to keep an eye on the burn pile during the day and intends to turn the shop into his home. He said I could go on the site and look at the burn pile. I asked about what was burned and he said he burns business waste during the day and after dark he uses it as a recreational fire but doesn't add more material after he stops working at dark.

64103	11/24/2025	11/25/2025	Ingredion	Other Odor	North Kansas City /Jackson	KCRO	AW	Email
Concerned Party: Steve Gilmore Concern Info: Via Webform email - Submitted at 9:47 pm Sunday, November 23, 2025 Date of Incident or First Noticed: 11/23/2025 I observed a ditch draining directly into the Missouri River with water that was: Brown/orange in color, opaque and visibly turbid. Had a strong rotten/decaying odor. Contained thick muck on the bottom; my fishing sinker dropped into it and was buried deeper than the leader length. Appeared to contain significant organic decomposition or industrial runoff. The ditch contents did not resemble ordinary stormwater or natural sediment flow. The odor and coloration suggested high organic loading, possibly from industrial processes. A live baitfish died after contact with the ditch muck, after it was apparent my fishing weight sunk in the muck further than the leader itself. I saw this after I cast into it and pulled the weight back drawing up darker mud which contrasted heavily with the orangish water and mud was stuck to the dead bait fish. The ditch water was actively flowing into the Missouri River at the time of observation - Connection to Nearby Facility. The drainage ditch is located directly adjacent to the Ingredion corn-processing facility. I am concerned that this discharge may be related to their wet-milling or steepwater processes. Using Google Earth and Google Maps imagery: Several of the facility's on-site ponds and tanks show the same brown/orange coloration as the ditch water. Historical Google satellite imagery from May 5, 2021 shows the same ditch discharging the same color plume into the river, indicating this may be a recurring issue rather than a one-time storm event. From the public permit (MO-0002534), my understanding is that Ingredion's allowed discharge is through a single outfall pipe under the levee, and that discharges must meet limits preventing visible color, odor, or solids. The ditch where I observed the discharge does not appear to match the permit description of their outfall. --- Reason for Concern Based on the observation and satellite imagery, this may represent: An unpermitted or uncontrolled discharge pathway, A failure of stormwater BMPs, process water escaping containment, which would not be compliant with the conditions of permit MO-0002534. The strong odor, opacity, and thick organic muck are inconsistent with permitted stormwater or cooling water discharges. [sic] Conclusions: Inspection will be conducted.								
64111	11/07/2025	11/14/2025	Dale Farms	Fugitive Particulate Matter	Ridgeway /Harrison	NERO	JH	Communication In Person
Concerned Party: Anonymous Concern Info: Caller reports corn dust is causing health problems to be worse. Dale Farms at Walnut St and E 1st St in Ridgeway is putting out lots of dust from the elevator and cleaning out trucks. [sic] Conclusions: No violations of the Missouri Fugitive Emissions regulations were observed at the time of the investigation.								
64114	10/09/2025	11/10/2025	Charles "Red" Cunningham	Open Dumps Open Burning	Auxvasse /Callaway	NERO	AW	
Concerned Party: John Sessler Concern Info: On October 9, 2025, the Northeast Regional Office received a concern stating that Charles "Red" Cunningham is hauling waste from St. Louis to the property directly across from 2485 County Road 157 in Auxvasse. Reportedly, the responsible party burned the waste two days ago. He reportedly burned paint cans and a couch. The caller stated that the property owner is deceased. The caller stated that the dump trailer on the property is full of waste. The caller stated that Charles Cunningham drives a Jeep Cherokee or a Blue Dodge. The caller stated that waste is blowing off the property into the road. [sic] Conclusions: At the time of the investigation violations of the Missouri Solid Waste Management Law and Regulations had been observed. However, no contact with the owner of the property for clarification of the use of items on the property had been made.

64118	11/19/2025	11/19/2025		Odor		SLRO	RA	
/St. Louis								
Concerned Party: Wendall Hawkins								
Concern Info: CP states that him and his wife have been smelling a strong odor - possible smell of methane near their house. He states that it wake them up around 1-2am and is present in the afternoon around 3-4pm too. He also states that it is hurting his wife's skin [sic]								
Conclusions: The residence location is within St. Louis County. I referred the concern to St. Louis County Department of Public Health.								
64119	11/19/2025	11/19/2025	south county area	Odor		SLRO	RA	
/St. Louis								
Concerned Party: Un named Citizen								
Concern Info: We received an odor concern from the DNR website. The CP states: There is currently a very strong burning smell in the entire Affton/Green Park area, stretching out to at least the St. George area. Walking outside for only a few minutes causes respiratory irritation. [sic]								
Conclusions: This concern is located within St. Louis County. I referred the concern to St. Louis County Department of Public Health.								
64127	11/24/2025	11/24/2025	Unknown	Open Burning	St. Joseph /Buchanan	KCRO	MC	Email
Concerned Party: Not provided								
Concern Info: Experienced Odor Date and Time: Nov 18, 2025 5:30 am								
Experienced Odor Duration: Currently experiencing the odor								
Experienced Odor Description: Smoky or Burning								
Experienced Odor Intensity: Strong or Offensive								
Experienced Odor Address and/or Location Description: Dewey Ave & Highland St. Joseph Missouri 64505 I live on Dewey and Highland, there has been an obnoxious, stifling, smell of burning leaves for nearly a week at this time. It seems like it never stops, currently is past midnight & filling our entire house. It's causing breathing difficulty. I assume it's a nearby neighbor given the intensity but I don't know who exactly. They're definitely burning outside of the permissible time frames.								
Potential Source: Likely burning leaves not sure								
Additional Information:								
Submitted at 12:24 am Sunday, November 23, 2025. [sic]								
Conclusions: Not enough information was provided to determine the responsible party. The concern indicates the source is someone burning their own vegetation, which is not prohibited by Missouri Air Conservation regulations. Referred to City of St. Joseph in case this violates local codes or ordinances.								
64128	11/05/2025	11/12/2025	Lincoln County Sand (Cody James)	Fugitive Particulate Matter	Winfield /Lincoln	SLRO	MC	
Concerned Party: Robert Strubinger								
Concern Info: Lincoln County Sand at 247 Pilsbury Road, Winfield MO 63389 has a sand conveyor that travels over Pilsbury Road and is dropping sand. It is getting on cars, in people's eyes and may damage the nearby levy. The concerned party gave us permission to come onto his property where they conveyor also passes over at 244 Pilsbury Road, Winfield MO 63389. [sic]								
Conclusions: No violations were cited during the investigation.

64129	11/26/2025	11/26/2025	Norris Quarries, Everett Quarry 1 - Plattsburg	Fugitive Particulate Matter	Lathrop /Clinton	KCRO	MC	Email
Concerned Party: Jenna Irwin								
Concern Info: Inquiry/Question -Via Webform email - Submitted at 4:24 pm Tuesday, November 25, 2025								
I had multiple questions about a quarry in Clinton county. The address is 510 SE 248th St, Lathrop, MO 64465. I wanted to know the following:								
-what are the regulations? -is it possible for this quarry to expand? - has there been any reports about how this quarry is affecting the land nearby or homeowners nearby - is there any plans for this quarry to start mining other minerals? I would like to know if there are any future plans for any major changes (if this is even possible to find out) - any pollution reports/research - has there been any investigations? - what pollution control is being done? - is there a regulated timeline that quarries can be active? Like what's the lifespan of a quarry? Do they shut down forever after a certain amount of years? What happens to a quarry when they are done operating? [sic]								
Conclusions: I provided some general information on the quarry and the portable crushing plant most recently authorized to operate at the site. I included a link to the construction permit (https://dnr.mo.gov/air/business-industry/air-permits/norris-quarries-port-0893-072023-011a). Land Reclamation provided information on the mine boundaries, mining regulations, inspections, public notice requirements, and reclamation.								
64130	11/26/2025	11/26/2025	Martin Marietta Materials - Randolph Mine	Fugitive Particulate Matter	Randolph /Clay	KCRO	MC	Other
Concerned Party: Anonymous								
Concern Info: Caller is a truck driver who travels frequently by what appears to be a mine, quarry, or similar operation located at NE Great Midwest Drive and Missouri Highway 210 which has blue dump trucks leaving one after another, day after day, that have giant plumes of white dust blowing out of them despite being tarped and it is so bad it chokes them up and other drivers honk and gesture at the dump trucks with dust blowing out of them too. Caller said they have reported the issue before, about six months ago, and this has been going on for a long time. The trucks generally travel out of this property down HWY 210 to HWY 291 where thy turn off towards the landfill. The dust is so thick that drivers cannot see and the dust makes them choke. They are surprised that this is allowed to go on routinely for such a long time with nothing done about it. [sic]								
Conclusions: Described concern appears to be related to dust coming off commercial vehicles. Referred to Missouri Highway Patrol, Commercial Vehicle Enforcement Division, which enforces commercial vehicle regulations for load securement and tarping.								
64131	11/13/2025	11/20/2025	American Commercial Barge Line	Open Burning	St. Louis /St. Louis City	SLRO	JC	
Concerned Party: Dylan Murphy								
Concern Info: We recieved an open burning concern from the DNR website. The CP states: Hall street near/in American Commercial Barge Line coal yard. Coal yard has been smoldering off and on for the past several weeks, often in the mornings. Smoke hangs in the morning fog and makes the entire area smell for quite some distance [sic]								
Conclusions: A site investigation was conducted and no violations were observed.								
64133	10/23/2025	11/06/2025	Residential	Open Burning	Festus /Jefferson	SLRO	MC	
Concerned Party: Hematite Fire Protection District (Trey submitt								
Concern Info: I spoke to Trey from the Hematite Fire District. His concern was about the property located at 12642 Matthew Drive, in Festus. The property owner has a 20x20 ft area that they burn undried wood and it causes a large amount of smoke in the area. The wood is alleged to come off-site. [sic]								
Conclusions: No violations were cited during the investigation. Hematite Fire will update the Department if the property continues to be a source of concern.

64134	11/17/2025	11/18/2025	City of Herculaneum	Odor	Herculaneum /Jefferson	SLRO	GH	
Concerned Party: Michelle Donovan-Cuddihee Concern Info: We received an odor concern from the EPA. The CP states: Sewer pump station is emitting hazardous/toxic fumes and has been reported to City Hall on various occasions. This is an ongoing issue affecting us to not be outside for more than a few minutes without feeling nauseous, triggering breathing issues and experiencing headaches. We live directly behind the pump station and the stench is seeping into our home. The smell of sewer gasses is overpowering and happens on a weekly basis. I indicated it wasn't an emergency because I feel that no one is going to lose their lives today, however, it is an emergency because it is affecting our health and needs to be addressed sooner than later. [sic] Conclusions: No violations of 10 CSR 10-6.165 "Restriction of Emission of Odors" was noted at the time of the visit.								
64135	11/18/2025	11/25/2025	Paul & Brenda Mizer	Used Oil Open Burning	Marshall /Saline	NERO	BH	Phone Conversation AC
Concerned Party: Victor Chevalier Concern Info: On November 18, 2025, a call from EER was received stating they had received a concern about the dumping of used oil and solid waste onto the ground by a property owner onto their own property. I then proceeded to ask for a concerned party's name and number to contact to get more information. I contacted the concerned party via telephone asking for more information. They told me that the source of the concern was unknown but they were moving around machinery that was leaking oil, antifreeze, and grease. They then proceeded to tell me the source of the concern was going to burn down a house the concerned party knew had asbestos in it. The concerned party stated the source of the concern was going to burn a pile of brush with tires in it. I asked what they source of concern was doing with the land and the concerned party told me that they are clearing it to farm the land. The concerned party stated he used to own the property but then the bank took it back. I asked them if he had an address for the concern and he told me past the water tower at the second T in the road on 200th Road, Marshall MO. [sic] Conclusions: No violations of the Missouri Hazardous Waste Management Law, Missouri Solid Waste Management Law, or Air Conservation Commission Regulations were determined. The concern will be administratively closed.								
64138	12/01/2025	12/01/2025	Eddie Piercall	Open Burning	Independence /Jackson	KCRO	CK	Phone Conversation
Concerned Party: Laura Ferguson Concern Info: Sent: Thursday, November 27, 2025 3:43 PM To: KCRO@dnr.mo.gov Subject: 1901 N Grove Drive Thanksgiving burning chemicals/junk black and blue smoke Good afternoon all, I am sending this on Thanksgiving day because I know you are closed for the Holiday. Eddie Piercall started burning at 8:30 this morning and has been burning all day. The smoke is black and blue and has a horrible chemical smell. It burns my lungs and eyes. Just wanted to document that this is happening after [the department] gave him the paper of what not to burn. Thank you [sic] Conclusions: Eddie Pierceall was found to be out of compliance with the 10 CSR 10-6.045, Open Burning Requirements. The Fort Osage Fire Protection Service issued a fire report for the September 11, 2025, response incident, which confirmed that durable goods were being burned on site at the 901 Grove Road, Independence address. He is being issued a Letter of Warning with no response required since Pierceall signed the violation acknowledgment while inspector was on site verifying that he had received guidance on open burning regulations. Contacted Fort Osage Fire Protection District and confirmed that in situations like this that the Fire District would respond to the open burning of prohibited items and provide a report to the Kansas City Air Unit. The concerned party was contacted and told that they could call 911 to report the fire to the Fort Osage Fire Protection District and the District would respond if there was another incident.

Concerned Party: Anonymous								
Concern Info: Email states, "The stench from the cannabis plant is horrible again today, 10/27/2025. Haven't been to work but 45 minutes and already have a headache and nauseous. Intersection of Lake St and Kellogg Ave. " [sic]								
Conclusions: Nearby strongest odors with nasal ranger 2:1 DT. Weather 53F, clear, 10 mph SSE, 75% humidity.								
64144	11/24/2025	11/25/2025	City of St. Mary	Odor Water Discoloration Bacteria in Water	St. Mary /Ste. Genevieve	SERO	DC	Memo
Concerned Party: Tyler Urban								
Concern Info: Received by email. CP States: The water supply in St. Mary has had an odd smell and cloudy appearance to it for many weeks now. Upon questioning city officials they state it is the hot water tanks. How can each household have the same issue? My water tanks is newer even. It is very concerning, I do not want to use the water. [sic]								
Conclusions: Milky water is likely caused by air in the lines, mainly noticed on the hot water side. The hydrogen sulfide odor was mostly observed in the hot water also. The city has reached out to the CP, and he has been encouraged to flush his hot water heater.

64146	11/26/2025	12/05/2025	Unknown	Open Burning Odor	Springfield /Greene	SWRO	BD	Site Visit
Concerned Party: Benjamin Cagle Concern Info: We have detected by a stone sense of smell and headaches and other health hazards that have happened to us due to this company, burning plastics, carpet and what not in the middle of the night and whatever weather allows, whether it be rain or cold. The are just off the highway of 160, which is Campbell just right outside of the city limits. They are close to Sonic and the Church of Southgate Baptist. We've lived here many years and for the last year and a half they've been burning solid during the most opportune times mostly at night when people are in bed or early in the morning when I rise, when it's cold and chilly about 3 a.m. We have been having to bring in our animals at night because of the stench, odor and toxicity are so strong. We are worried about out pets. This is not every night and maybe once a week or maybe once a month. It has been going on for a long time and we are catching the western wind a little bit southwesterly from this place all day long and they are burning illegal materials you can pick up as you feel nauseated from the smell in the air and the toxicity as it burns your eyes. If you want a good character review on this company, they are the ones that shoot late at night with shotguns and have a deer stand out in the woods right behind our houses where they shoot randomly throughout deer season. If you check the map, this is quite tight quarters to be having hunting going on. Anyway, I guess some people feel like they can get away with murder. Hopefully, they don't get away with this one. [sic] Conclusions: CON-734 A doorhanger packet with Open Burning Fact sheets and investigator contact information was left at the front door. No further action is required.								
64148	12/01/2025	12/05/2025	Sean Pryor	Open Burning Open Dumps: Construction and Demolition	Shell Knob /Barry	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Pryor Construction burning tires, plastic/rub/foam components from derby cars, and trade waste from construction regularly at the end of their property on the back side of a 20x60 mechanic shop, in a ditch. Those contaminants blow off the burn pit, while burning and or smoldering, and the remaining debris and chemicals are washed down a ~250 foot ditch about 500-1000 feet directly into a cove on Table Rock Lake. I have breathing problems, and a street over on Hickory, I can barely breath when the fumes blow my way. The neighbors directly around them get poisoned when it's windy like 11/29/2025 @ 6:00pm and there is a tire fire blowing smoke horizontally into people's houses at 30+ mph. Toxic fumes with dark orange flames and black strands of ash that cover things outside. Regular occurrence because of trade waste and derby car parts being stripped for numerous drivers and events. [sic] Conclusions: CON-744 I did not observe any violations during this investigation. No action is required.								
64150	12/01/2025	12/08/2025	Ben Hall	Open Dumps Open Burning	Willard /Greene	SWRO	GE	Communication In Person

Concerned Party: Anonymous								
Concern Info: A staff member of the City of Springfield's Department of Environmental Services department is referring a concern based on an investigation they conducted that there is an issue with a plasma torch being vented to the storm drain and solid waste leaving the property [sic]								
Conclusions: CON-763 The facility has agreed to clean the ground surrounding the emissions vent to prevent any future runoff issues by the first week of January 2026. No further action is required.								
64157	11/17/2025	11/19/2025	Residential Business	Odor	Wentzville /St. Charles	SLRO	JC	
Concerned Party: DeAnne Todd								
Concern Info: We received an odor concern from the EPA and a follow up email. The CP states: Next door neighbor has a home-based business where she spray paints patio furniture to sell at least 3 days per week. Our driveways are approximately 20 feet away from each other. I cannot have my windows open and the fumes are strong and toxic when i walk outside. I have involved the city, which says she has a home-based business permit, and it is not against our local ordinances. I can even smell this in my backyard and on my deck. I have be told to video her for evidence, which i have done, but when I do, she calls the police on me. My son and I had a garage sale, and she was spray painting for hours, seemingly on purpose. [sic]								
Conclusions: A site investigation was completed and no violations were observed.								
64158	10/27/2025	10/28/2025	Lappe Cement Finishing	Other	Perryville /Perry	SERO	HC	Letter LOW
Concerned Party: Anonymous								
Concern Info: rec'd via email - cp states: Burning of abandoned house full of asbestos, recently sold to new owners [sic]								
Conclusions: Letter of Warning issued on December 2, 2025.								
64159	11/17/2025	11/18/2025	Ravinia Estates	Open Burning	Fenton /Jefferson	SLRO	GH	
Concerned Party: Anonymous								
Concern Info: We received an anonymous open burning concern from the DNR website. The CP states: One of my neighbors has been burning plastic multiple times a week. There has been several occasions they are having bonfires and burning plastic for several hours in the back of their mobile homes. It's hard to breathe outside due to the toxic smells. There's been times they burn plastic in the back near the woods. [sic]								
Conclusions: During the inspection, I did not see any open burning violations. Ravinia Estates issued an internal violation to the residents and will be continuing to monitor the trailer.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64160	12/01/2025	12/09/2025	Double O Organics	Odor Other	Monett /Lawrence	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Caller states there is a strong odor from Double O Organics at all times. Caller said they smell the odor depending on the wind direction. Caller said they have smelled the odor from 0.5 miles to 2.5 miles away. Caller states that Double O Organics has 18-wheelers going in all the time and gave an example of 2-3 within one hour. Caller said there are fewer load going out than coming in. Caller mentioned wood chips from Hansen's and also said that others mentioned animal carcasses being brought in. They added that the piles are growing larger on the property and mentioned that sludge had gone off the property. Caller said a nearby landowner built a retaining structure in response to the sludge leaving the property. Caller said that there is a ditch to the south of the piles and that nothing grows along this ditch. Caller is concerned about possible groundwater contamination and mentioned hand-dug wells. Caller said the investigator may want nose plugs. [sic] Conclusions: CON-756 I did not observe any violations during this investigation. No action is required.								
64164	12/01/2025	12/08/2025	Ben and Angie Hall	Residential Waste Hauler Open Burning	Willard /Greene	SWRO	GE	Communication In Person
Concerned Party: Emily Bahner Concern Info: Caller states that their neighbor is advertising a trash hauling business on their Facebook and accepting waste to bring back to their house to burn. Caller states that there are several trailers worth of junk that they are being paid to dispose of and burn approximately every 5-10 days. Welcome to Ash Grove MO Facebook page. Post on November 11 and 16, 2025 by Angie Hall for son: Kyle Hall (16 yrs old) 417-988-3885 [sic] Conclusions: CON-749 Hall signed the air pollution violation acknowledgement letter. Same as concern-755								
64165	10/21/2025	10/21/2025	Earnest Kleier	Open Burning		SLRO	MC	
Concerned Party: Anonymous Concern Info: MSC 10/21/2025: Caller did not wish to give name but wanted their phone number on file to be contacted. This SoC has been investigated two previous times 6/25/2024 & 10/17/2025. In Summary no violations were issued however facts sheets have been sent to the SoC. The Burn barrel has been moved to the front of the property, and it was stated that porch materials are being burned such as spindles and coated wood. The fire department was not called to respond and to the CPs knowledge has not responded to the property. [sic] Conclusions: No violations were issued during the investigation. The Concerned party will contact the department if alleged burning continues.								
64166	11/17/2025	11/17/2025	AZZ Galvanizing	Opacity	St. Louis /St. Louis	SLRO	RA	
Concerned Party: Stephanie Todd Concern Info: We received an opacity concern from the DNR website. The CP states: Facility is AZZ Galvanizing located at 1461 Kin Ark Ct, an unincorporated area in St. Louis County. Several times a day this facility emits yellowish smoke going in nearby residents yards and the adjacent city park. Complaints have been filed with St Louis County for several years, but they claim they have to see the smoke and when an inspector shows up, no smoke is being emitted. So, they close the ticket. The facility is open on three sides. Do they have an air permit? Galvanizing uses a lot of chemicals and if they are vaporized, it appears there is no attempt to keep them from going into the atmosphere. [sic] Conclusions: AZZ Galvanizing is located within St. Louis County. I referred the concern to the St. Louis County Department of Public Health.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64167	11/07/2025	11/14/2025	Residential	Open Burning	St. Louis /St. Louis City	SLRO	JC	
Concerned Party: Anonymous								
Concern Info: We received an anonymous open burning concern from the DNR website. The CP states: 1908 Sidney St Louis. Problem property that engages in open burning the creates excessive smoke and enters into neighbor's yards and homes. Property has been reported to police and fire department and the EPA. Problems persists, causing safety and health issues for Benton Park neighborhood. Believe ordinance and other laws are being violated. Excessive smoke that lingers and travels to other's property is considered a nuisance. Ask for enforcement and intervention to keep our neighborhood safe. [sic]								
Conclusions: No violations were observed during the investigation.

64172	11/13/2025	11/13/2025	Purina Farms	Odor	Gray Summit /Franklin	SLRO	GH	
Concerned Party: Page Castillo								
Concern Info: The concerned party (CP) called about a lake on Purina Farms property in Gray Summit. According to the CP, the lake is releasing a foul methane odor and the CP's daughter goes to a pre-school next to the lake. The CP stated that she spoke with her daughter's teacher about the odor and was told that the school can't do anything about the odor. The CP is concerned about the gas odor and believes it could be a health hazard. The lake is visible from the pre-school. The concerned party would like a call to discuss when assigned to an investigator. [sic]								
Conclusions: No violations of 10 CSR 10-6.165 "Restriction of Emission of Odors" were noted at the time of investigation.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64173	11/10/2025	11/12/2025	Residential Apartments	Other	St. Ann /St. Louis	SLRO	RA	
Concerned Party: Anonymous Concern Info: We received an anonymous indoor air concern from the DNR website. The CP states: Check for carbon monoxide poisoning, furnace and air conditioner. Black soot in the smoke detectors. Foul odors and we get real sick, confused, pass out, nausea and can't breathe. I have sent in pictures before and I took recent pictures again and the electric box panel labels have changed. There's black marker on my wall that wasn't there before. No one has a key to the apartment. I was hearing work being done over our apartment overnight. I saw and heard things that should not be going on. We walk in from work and pass out. I can never get maintenance to fix our issues. We have to pay under the table. The property manager is doing foul things and I believe that they hooked up electric to my bill. There was toggling into my bill. It should not be \$200 a month for a 800sq foot apartment and kept going up every month. I was caught up. We were told no smoking but everyone smokes in the other apartments. I think they are trying to fix and cover up what I found. I was harassed until I moved out. But my bf lives there still when I visit the smell is still there and I don't feel good after I get there but when I go home I seem to feel better. I have mold in the air and furnace behind my fridge and in the bathroom. Floors are sogging and front door frame is constantly moving. We were suffering and he still is. We can't get healthy rodents are getting in the roof. I think we are breathing in fieces. [sic] Conclusions: No site investigation was conducted. DNR does not regulate indoor air. I referred the concern on 11/6/2025 to the St. Louis County Department of Public Health.								
64194	12/03/2025	12/04/2025	Show-Me Organics Inc.	Odor	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party: Willy Blystone Concern Info: Concerned Party reports that he smells very strong weed smell that smells terrible at the intersection of 150 Highway and 49 Highway in Grandview. CP reports that he smells it all the time whenever he is in that area and feels that he should not be subjected to this odor. [sic] Conclusions: Concern was referred to the Missouri Department of Health and Senior Services, which regulates cannabis cultivators. Part of those requirements is the implementation of an odor control plan. Additionally, since the facility is within Kansas City, the concern was also referred to the City's Air Quality Program.								
64202	12/03/2025	12/12/2025	Unknown	Odor	Springfield /Greene	SWRO	BD	Memo
Concerned Party: Savannah Keller Concern Info: It smells like sewage. It smelled like salt and methane/sulfur. We noticed it when exiting i44 on chestnut all the way to our house at the provided address by the airport. It is ongoing as I make this report. [sic] Conclusions: CON-780 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors were observed during the investigation. The source of the odor experienced by the concerned party could not be determined. Site surveillance will continue if additional concerns are reported.								
64203	12/03/2025	12/11/2025	Chance Simpson	Open Burning	Eldon /Miller	SWRO	JW	Phone Conversation
Concerned Party: Eithne McDonald Concern Info: There are at least 3 open fires burning vegetative waste which were started using off-road diesel by an employee or contractor of Simpson Grading. These fires are less than 150 feet (far less than the 200 yards required by 10 CSR 10-6.045) from an occupied structure at 25 Cender Dr, less than 400 feet from an occupied structure at 7 Cender Dr, and less than 200 yards from an occupied structure at 26 VFW Rd. I saw an employee or contractor of Simpson Grading using off-road diesel (red in color) to start these vegetative waste fires very close to two occupied structures, including my house and that of my nearest neighbor. [sic] Conclusions: CON-778 I did not observe any violations during this investigation. No action is required.

64205	11/04/2025	11/04/2025	unknown	Other	Farmington /St. Francois	SERO	HC	Referred to Other Agency
Concerned Party: Tiffany Spangenberg								
Concern Info: This concern came into (Airompliancereporting@dnr.mo.gov) email address on October 3 2025 but did not come to SERO until 11/3/2025. 319 Hickory Street Farmington Missouri 63640 The entire neighborhood, I live at 313 Hickory Street and I believe it's coming from my neighbor down the road. It's been on going for a week. Potential Source: Some sort of engine that's old This house in particular 319 Hickory Street has had multiple calls on them from other residents complaining of smells and orders coming from their house. They have illegal burned plastics and trash and have had the fire department called on them four times already. And now it smells like an engine is on fire and has precisted for a week now. Additionally they have a camper that is set up in their back yard that they have been living out of for about five months now. [sic]								
Conclusions: On November 12, 2025, I spoke with the City of Farmington to relay information regarding the concern received by the department. I stated that the department is referring the concern to the city code enforcement. The city representative stated they would take a look and take action as needed. I explained that if the city needed any information or help with the investigation to reach out to the department.								
64206	10/24/2025	10/28/2025	Delta Gilts Hog Farm	Other	Oran /Scott	SERO	BG	Memo
Concerned Party: Jeremy Vance								
Concern Info: CP states "I am located at 20153 US-61, Sikeston, MO 63801. I believe there is a hog farm about 2.5 miles away from my house; however, we consistently have recurring smells from the location coming into the area of our property." It is a strong odor that smells like fecal matter. [sic]								
Conclusions: No violations were observed.

64226	12/05/2025	12/09/2025	International Dehydrated Foods	Odor	Monett /Barry	SWRO	JW	Communication In Person
Concerned Party: Anonymous Concern Info: *Web Form* International dehydrated Foods located in Monett plants releases harsh, noxious, nuisance level odors that violates Monett local ordinance chapter 225 against nuisance. fsilfee@symrise.com [sic] Conclusions: CON-788 I did not observe any violations during this investigation. No action is required								
64229	11/24/2025	11/25/2025	Jefferson County Public Sewer District	Odor	/Jefferson	SLRO	AC	
Concerned Party: Jim Nelson Concern Info: U.S. EPA Region VII forwarded a concern regarding the sewer in Crystal City: "Incident Description: • Sewer at approximately 1411 Crystal Heights Rd, Crystal City, MO • 2-3 years ago the city came out and checked this line, due to odor concerns. Eventually someone came out and pumped it out. • The sewer again started smelling bad this summer, and the odor has been really bad the last 3-4 weeks. • Talked to the City, but nothing has been done to fix the issue. • Feel free to call the informant if you have follow-up questions, though he typically screens his calls, so you'll need to leave a message." [sic] Conclusions: Both I and the Jefferson County Public Sewer District's team were unable to detect a sewer-like odor in the area provided by the CP. And the nearby manhole covers and stormwater drains displayed no visible issues. Jeff County has stated in an email that they will continue to monitor the area for any changes.								
64230	12/04/2025	12/04/2025	Multiple	Other	Cameron /Clinton	KCRO	MU	Other
Concerned Party: Anonymous Concern Info: Reporting three different demolition concerns. 1) demolition happening off 3rd street and 4th street in Cameron. Nicholson Construction may be the name. Hauling it with brush truck or storm clean up truck. improperly disposing of demolition waste. Not sure where the material is being taken to but heard they are hauling the material on the weekend and dumping it in a ditch. 2) Structure demolished by burning off NW Packard Land in Cameron. 3) Another company that works in St. Joseph is hauling to Amazonia Missouri and the persons accepting the material will burn the demolished construction materials for them. Not sure which company is doing that or where it is going. [sic] Conclusions: Contacted as many of the locations that could be verified. Information provided was not consistent with the allegations. Concern closed.								
64233	11/21/2025	11/17/2025	Shamus Michael Peterson	Open Burning	Odessa /Lafayette	KCRO	DS	Phone Conversation
Concerned Party: Captain Terry Crawford Concern Info: Initial Interview Good afternoon this is Terry Crawford at Odessa Fire Department. We responded to illegal burning of trash and a tire at 2349 Carriage CT. I advised no burning was allowed at Holiday Lakes. I did not see any signs on entry and exit of the area. The person who was burning is Shamus Peterson. He stated DNR has gave him a ticket before. He did not seem to be bothered by another ticket. And did not speak kindly of DNR. [sic] Conclusions: According to the fire department, the fire contained household waste except for one tire. There is insufficient evidence that the tire was burned intentionally. No further action at this time.

64240	12/08/2025	12/08/2025	April Hawkins	Open Burning Hazardous Waste Generators	Gower /Clinton	KCRO	MC	Referred to Other Agency
Concerned Party: Kayla								
Concern Info:				mail - Submitted at 2:19 am Saturday, December 6, 2025 - Date of Incident or Date First Noticed: 09/03/2025				
				Hazardous 1950's waste being sold as fire pit(s) on Facebook Marketplace. Burning being the primary usage point of what these are being sold for makes it a highly probable environmental and public health concern for anyone these are being sold to that then take them back to their own homes/towns and contaminate not only their yards and homes but their unknowing neighbors as well. These are not staying isolated to one's own farm/land. I have a personal connection to one person who bought and brought one home to their Northland Kansas City upper middle class neighborhood. Since the original post of these, 2 others have seen and replicated similar FB Marketplace listings for these DIY hazardous firepits. I believe this has the potential to be a major localized public health crisis. After my BIL came home the one of these, I got the information and found the listing. I originally messaged the FB marketplace listing and April Hawkins replied back forwarding me on to her dad, Gary's, cell phone number to text for more details. Upon this text I learned "Most of them are 1950s." I was skeptical about the age of them since the photo that my BIL showed me of his had the distinctive alligatoring pattern of lead paint. After losing a lot of sleep about potentially upsetting my BIL/causing a rift about it, I messaged both April and Gary separately about the safety concern on 9/8/25. It shows the message was sent to April but no reply and it shows the message was read by Gary on 9/11/25 but no reply (and listings still up and running). Losing more hours of sleep about the subject I decided to look into what else could be done. I didn't know I could report it or I would have sooner. I believe I did report the listing on FB Marketplace but it wouldn't allow for anything specific to be reviewed. DIY's are great and a resourceful way to recycle and repurpose but hazardous waste of that age that you actually are supposed to have to pay to have removed from your property because of hazard itself is a very dangerous DIY that may likely affect more than just the seller and buyer. (**ACE has character limit. Unable to enter entire text. Review Power App for further.) [sic]				
Conclusions:				The described activity does not appear to violate any air pollution regulations. I discussed the concern with the Waste Management Unit. After conferring with the Waste Management Program, this does not appear to violate hazardous waste regulations either.				
				I forwarded the provided information to the Missouri Department of Health and Senior Services and the United States Consumer Product Safety Commission in case they can address this.				
				I advised the concerned party that if they believe to have been exposed to lead to contact their physician, local health department, or the Missouri Department of Health and Senior Services (https://health.mo.gov/living/environment/lead/) for guidance.

64241	12/08/2025	12/09/2025	Sean Pryor	Open Burning Open Dumps: Construction and Demolition	Shell Knob /Barry	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Pile of construction waste, used plastic sheeting, styrofoam insulation board, and plastic parts from cars used in derby car races. Noticed pile 12/6/2025, burn took place between 4:30 pm - 5:30 pm 12/7/2025. This went from a monthly occurrence, to nearly once a week. Burning and smoldering plastic, rubber, and treated lumber for hours, incomplete burn. Burn pit is in a ditch on their property/county property line. The ditch on their property/county property line. The ditch runs a few hundred feet into Table Rock Lake. [sic] Conclusions: CON-804 I did not observe any violations during this investigation. No action is required.								
64245	12/08/2025	12/11/2025	Greenwood Hills Subdivision WWTF	Minor Wastewater Facility	Fulton /Callaway	NERO	KC	Report
Concerned Party: Helen Herigon Concern Info: The concern form states, "The water treatment plant by Greenwood Hills has been smelling like a sewer since the summer! My land is bordering it and the runoff flows into my creek. It is disgusting and I am tired of it!! I have reported on this and nothing is being done. They say the County is taking care of it, but it's not happening. Isn't DNR supposed to police this? How long do we have to put up with smelling sewer air, it's putrid!!!!" [sic] Conclusions: At the time of the inspection, I did not observe any excessive odors from the wastewater treatment facility. The following violations were discovered during the inspection and were cited in the inspection report: (1) Failed to apply for renewal of the Missouri State Operating Permit at least 180 calendar days prior to the expiration of Missouri State Operating Permit (MSOP) #MO-0121274, (2) Since October 1, 2023, operated, used, or maintained a water contaminant or point source, lagoon system, which discharges to a tributary to Middle River, waters of the state, without a Missouri State Operating Permit (MSOP), (3) Failed to comply with effluent limitations, and (4) Failed to collect an influent sample in order to ensure a removal efficiency of 65% is being met by the wastewater treatment system.								
64254	12/09/2025	12/10/2025	Unknown Cloud Seeding	Other	Forest City /Holt	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: Caller was concerned about they believe a plane was cloud seeding in the area around 25995 Maywood Road in Forest City (this is the closest address they could find). They were worried about any health concerns. After plane passed it was very cloudy, and they couldn't see past their vehicle. [sic] Conclusions: Missouri Department of Agriculture, Pesticide Control Program.								
64262	12/10/2025	12/17/2025	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	DS	Phone Conversation
Concerned Party: Nelson (Nate) Christensen Concern Info: Concerned party states that DNR should talk to new owners on AA Quarry. The stink is horrible. [sic] Conclusions: No odors were observed during the investigation. The facility believes the odor could have been caused by a clogged nozzle in the system used to neutralize the odor. The nozzle was cleaned upon discovery and has been operating properly since.

64263	12/10/2025	12/11/2025	Roberts Tire Center - Danny Roberts	Odor	Harrisonville /Cass	KCRO	CK	Phone Conversation
Concerned Party: Lynne Calvin								
Concern Info: Submitted at 5:27 am Wednesday, December 10, 2025.								
Experienced Odor Date and Time: Dec 9, 2025 12:00 pm								
Experienced Odor Duration: More than 2 hours								
Experienced Odor Description: Petrochemical								
Experienced Odor Intensity: Mild								
Experienced Odor Address and/or Location Description: 1005 W Washington Street Harrisonville Missouri 64701								
Potential Source: Coming from the south or south west								
Additional Information: This has been an ongoing problem. I smell it everyday. Sometimes at night. (I sleep with the windows open). [sic]								
Conclusions: The petrochemical odor was determined to be coming from the oil heater at Roberts Tire Center located at 703 South Commercial Street in Harrisonville. The roof stack exhaust was found to be dark and odorous. The owner, Danny Roberts, agreed to provide maintenance on the unit and has called their service provider. Roberts will be keeping me updated on the status of the required work.								
64265	12/10/2025	12/11/2025	Everygy - Iatan Generating Station	Odor Particulates	Weston /Platte	KCRO	JS	Other
Concerned Party: Anonymous								
Concern Info: The air carries a strong, noxious chemical odor that is a mixture of burning tires and trash, and at other times the air is dominated by nitrogen dioxides and Sulphur dioxide. Some combination of these is a nearly nightly occurrence. This pollution created thick visible smoke in the area all day today and it caused acute respiratory distress (coughing, sneezing, and scratchy throat) and burning eyes today. Symptoms were experienced by a family member with no prior history of lung problems. The emissions were observed originating from the direction of Weston, MO (64098) the day before and are concentrated worst in the Bluff Woods Conservation Area, with impacts felt severely in St. Joseph, MO. The emissions are not consistent with a wildfire but represent chronic industrial and illegal waste disposal activity that requires a full administrative audit. [sic]								
Conclusions: No violations were observed during the investigation. Interviews with local fire, conservation, and facility personnel indicate no issues in the area. Compliance reports from the facility were also reviewed, and no issues were observed that would cause the described concern.								
64272	12/12/2025	12/16/2025	MSE Hardscapes	Used Oil	Raymore /Cass	KCRO	DS	Other
Concerned Party: Anonymous								
Concern Info: Called on COD line-anonymous CP reports that person at 1521 Saddlebrook Rd Raymore, MO in Cass County has been burning tires and other non-vegetative items and has also been reportedly dumping waste oil into the creek near the home. [sic]								
Conclusions: Compliance assistance on open burning and used oil.								
64280	12/12/2025	12/12/2025	Ben Hall	Residential Waste Hauler Open Burning	Willard /Greene	SWRO	GE	Email
Concerned Party: John Eckert								
Concern Info: The concerned party first noticed the incident on 12/01/2025. The concerned party states that the property owner at 7328 W. Chalarren is hauling trash, yard waste, and furniture for profit back to their property and burning it when the pile gets big enough. Trash is blowing onto neighboring properties before, during, and after burning. [sic]								
Conclusions: CON-857 Identical concern, tracked through CON-749

64294	11/07/2025	11/10/2025	Base Rock Mineral	Hazardous Air Pollutant Release	Jackson /Cape Girardeau	SERO	BC	Phone Conversation
Concerned Party: Anonymous Concern Info: The National Response Center report states: " CALLER STATED THAT A ROCK QUARRY IS OFTEN RELEASING AN UNKNOWN NOXIOUS CHEMICAL SMELL. CALLER STATED THAT IT SMELLS SIMILAR TO DIESEL EXHAUST. CALLER DOES NOT KNOW THE CAUSE OF THE RELEASE OR WHAT THE MATERIAL IS BUT STATES THAT IT IS NEAR A NEIGHBORHOOD SCHOOL AND HAS CONCERNS ABOUT WHAT IS BEING RELEASED." [sic] Conclusions: At this time, no violations were observed.								
64326	12/11/2025	12/15/2025	Carrie Lutterman	Animal Waste Open Burning General Water Quality	Wildwood /St. Louis	SLRO	RA	
Concerned Party: Mark Allen Concern Info: Caller states that his neighbors have been burning multiple "toxic" things on the property (17841 Orrville Rd., Wildwood, MO 63005). He states that the neighbor does not live at this property but lives at another property in Wildwood (16244 Lone Cabin Dr., Wildwood, MO 63005). He states that his neighboring property has turkeys, chickens, and guineas and all waste generated from animals is burned and creates a terrible odor. Along with burning this waste he states that the neighbor will occasionally bring over random waste (ex: couch and other random residential waste) on a trailer, dump the waste on the property, and burn it in a burn pit. He states that they will start a fire late at night and leave it unattended. He also states that the neighbor will take animal waste and used kitty litter and dump it over his well head. The CP would like to be called back by an air investigator so he can explain the situation/ show any pictures of the burning toxic materials. [sic] Conclusions: The concern is located within St. Louis County. I referred the concern to the St. Louis County Department of Public Health APCP								
64338	11/03/2025	11/04/2025	Unknown	Open Burning	Jefferson City /Cole	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Online rpt: "Heron St. Off of Seven Hills, Jefferson City 65101. At the end of Heron. Burning brush again. Ash falling on the street next to it, Wilmor Dr. and Seven Hills. They had previously been spoken to about the same issue." [sic] Conclusions: At site, found a trailer and a dirt road back into the wooded area, but nobody was on site and I saw and smelled no evidence of burning. I followed the dirt road and tracks to the end and found nobody present and no evidence of burning.								
64339	10/31/2025	12/04/2025	Bluebird Composting	Odor	Fulton /Callaway	NERO	DB	Site Visit
Concerned Party: Sarah Talbert Concern Info: Caller reports that strong odors are emanating from Bluebird Composting. [sic] Conclusions: 11/4 1130 AM, winds S13-27, 60% humidity, found no compost odors downwind or nearby.

64342	11/05/2025	11/13/2025	Bluebird Composting	Odor	Fulton /Callaway	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Caller reports that Bluebird Composting smells nasty, worse than a pig farm. States they have had odors the last couple years but this year and especially the last couple months it is much worse. [sic] Conclusions: No violation found at time of investigation. 10:15 AM, 56F, wind SE 8-16 mph, 60% humidity, mostly sunny. Strongest odors <2:1 DT.								
64343	11/05/2025	11/13/2025	CE Grain Company	Odor	Vandalia /Audrain	NERO	DB	Site Visit
Concerned Party: Sharon Myers Concern Info: There is a terrible odor along highway 54 between vandalia and farber close to the old CE brick plant. This odor has been there off and on for a few years. It's absolutely terrible and can be smelled for at least a mile Note: See file for history, previous RNOV and AOC 2017 and 2021. Has had odors while turning piles and applying on fields nearby, so if this is field application it may be ag exempt. [sic] Conclusions: No violation of the odor rule found during investigation. 11:20 @ site, 61F, SSE 12-18 mph, 47%, fair skies. Minor odors found downwind on highway 2:1 DT, odors not on gravel road farther back. Fields nearby showed evidence of plowing. I called owner, discussed concern. He said they have been spreading ~3k tons this fall and the odor usually settles down overnight and picks back up when they load trucks.								
64344	11/14/2025	11/19/2025	Capital Quarries Stadium Quarry	Fugitive Particulate Matter	Jefferson City /Cole	NERO	DB	Site Visit
Concerned Party: Zack Concern Info: Online report states: "I was at Sam's club today shoping and the quarry next to it was blasting. When I came outside to my car it was covered in dust! That can't be good with all that dust in the air plus they got everything around there covered in dust. I tried to call them they didn't answer so I left a message and they have not called me back. If the blast they should have no wind that day." [sic] Conclusions: At site, observed no visible emissions crossing property line and very little dust on the quarry property. Nearby surfaces show no unusual dust/dirt accumulation. I called and left a message for the Chris Thiltgen.								
64366	11/18/2025	11/24/2025	Five Star Demo	Fugitive Particulate Matter	St. Louis /St. Louis City	SLRO	RA	
Concerned Party: Ahman Al-Alim Concern Info: We received a dust concern from the EPA. The CP states: Five Star Demo while demolishing 1919 Cora Ave has sprayed contaminants into the air since beginning on 10/05/2025. They are releasing a cloud of contaminants and not using the required water spray down method to minimize releasing contaminants into the air. They are also not providing their hired workers with breathing protection when demolishing. My complete yard, ac unit and in home is covered with these contaminants. The CP also alleges that Five Star demolition has tore down the house at 1919 Cora Ave. Judging by the age of the building it is a candidate for lead and asbestos materials. They placed all the contaminants in the basement cavity and covered it with dirt. They did not remove the questionable material and place it in dumpsters to properly handle such waste. This must be an environmental violation. [sic] Conclusions: A site investigation was conducted and we did not find any violations.								
64375	12/15/2025	12/23/2025	Wyatt Bonecutter	Open Dumps: Construction and Demolition Open Burning	Russellville /Moniteau	NERO	BH	
Concerned Party: Anonymous Concern Info: On December 15, 2025, the Northeast Regional Office received a concern stating that Wyatt Bonecutter, the owner of Land Guard Landscaping, was hauling demolition waste to a property south of 58004 Genny Road near Russellville. The concerned party told me that he is currently dumping waste at the western tip of the property where Genny road intersects with a driveway that turns north. The concerned party alleges that he is hauling waste from his landscaping business to his property. The concerned party told me that the waste consists of vegetative waste, a coffee table, fence panels, a rabbit cage, and carpet padding. The concerned party stated that Wyatt Bonecutter will periodically burn the waste. The concerned party stated that Wyatt Bonecutter used to dump waste further east on the property near a pond, but he burned that pile and it is unknown how the burn residue was managed. [sic] Conclusions:

64415	10/15/2025	10/20/2025	Generational Builders	Open Burning	Jamesport /Daviess	NERO	JH	Communication In Person
Concerned Party: Anonymous Concern Info: Illegal burning. Burning construction materials. Sometimes multiple times per day, this has been happening for a long time. Black smoke, bad air, definitely air quality violation. Burning is usually between 5 and 6 am or in the evenings sometimes as late as 10 pm. It's gotten to be everyday. Sometimes morning and evening. There really isn't a chance to have non smoke air if you live or work in the area. Please help all we want is to be able to breathe Note: Google Street View from September 2021 shows a possible burn site in the south center of their graveled lot with concrete on two sides, about 230 yards to nearby other owner building I see on Google Maps. See ACE# 58937 for previous concern at this site, which did not identify a violation in their burn pile. [sic] Conclusions: No violations of the Missouri Open Burning regulations were observed at the time of the investigation. No further action required to address this concern.								
64464	11/13/2025	11/17/2025	Unknown	Other	/Stoddard	SERO	HC	Site Visit
Concerned Party: Anonymous Concern Info: Unknown company/person tearing down old hotel behind The Office Bar on Hwy 25 near Bloomfield. Dump trucks are hauling debris away. Anonymous concern party states that they do not believe they had the proper documentation to tear the old motel down and wonders where they are taking the debris. [sic] Conclusions: On November 17 and November 24, 2025, I visited the site. I surveyed the general area during both visits and there were not signs of any demolition activities noted. Lemons Landfill was able to provide disposal receipts from October of 2025. It appears to the investigator that the material disposed of may have come from the partial burned building on site, but no active demolition activities or equipment was noted at the time of the investigation. With current information and site conditions, more information would be needed to continue an investigation. No further action will be conducted unless another concern is submitted on the site.								
64484	12/09/2025	12/12/2025	unknown	Odor	/Cape Girardeau	SERO	CB	Site Visit
Concerned Party: Shawna Coleman Concern Info: CP states that she is the manager of the Dollar General located at 3927 Lasalle Avenue, Cape Girardeau, MO. The lagoon that services the two rent houses next door has a horrible odor that customers are complaining about. She said this has been going on for over five years and that over the summer, the property owner of the lagoon was told by DNR to remove the sludge. The property owner used a backhoe to remove the sludge and placed it on the banks. The sludge is still sitting there six months later and has not been properly disposed of. CP believes this is causing some of the odor and it is bad for her business. [sic] Conclusions: A site visit was conducted on December 12, 2025, to assess conditions of the lagoon. During the site visit, no foul odors, sludge from the lagoon, or visual concerns of the lagoon's berms were noted. Additionally, the lagoon was not discharging at the time of the site visit. Contact was made with the CP to discuss my findings. Department regulations were discussed, and it was mentioned that the department does not regulate odors from the lagoon. I informed that CP that a discharge from the lagoon should never occur and to call the department if a discharge is observed.

64490	11/29/2025	12/01/2025	Nathan Walter	Other	Bell City /Stoddard	SERO	HC	Email
Concerned Party: Anonymous Concern Info: Received by email. CP States: The people that were knocking down the old house and throwing the debris in a hole are now burning it again asphalt shingles insulation and other construction materials are being burned. Please send someone out. [sic] Conclusions: On December 1, 2025, I arrived on site around 2:30 p.m. and observed the site from the vehicle. There were signs of a structure being demolished but no visible signs of burning or debris being buried. I continued to city hall to ask if there had been any fires or demolitions on Spears Street recently. The city clerk stated she had not seen any fires or material being buried in recent days. I attempted to make contact the fire department with no success. On December 2, 2025, I spoke with a representative of the city fire department who stated he did not notice any burning in town, but did know that Nathan Walter was planning on demolishing a house on Spear Street. The fire department representative provided Nathan my contact information for a telephone conversation. On December 4, 2025, I spoke with Nathan via telephone who stated he had a house demolished next to his and used Thompson Excavation for the job. He said all demotion waste was removed using a dump style truck. He stated the contract did burn a small amount of untreated would from an unfished addition to the interior of the house, the ash would have been mixed into the fill dirt. Information and factsheet will be provided to Nathan via email. On December 5, 2025, I spoke with Justin Thompson who explained the project and reiterated Nathan's conversation. Information and factsheets were provided to Justin via email.								
64492	11/28/2025	12/01/2025	Nathan Walters	Other	Bell City /Stoddard	SERO	HC	Email
Concerned Party: Anonymous Concern Info: Received by email. CP States: Nathan walters lives on the same street as me and he is knocking down a house and burning everything in a hole. Shingles,insulation all of it. The smoke is black from the shingles burning and he will bury it after it's burnt. [sic] Conclusions: On December 1, 2025, I arrived on site around 2:30 p.m. and observed the site from the vehicle. There were signs of a structure being demolished but no visible signs of burning or debris being buried. I continued to city hall to ask if there had been any fires or demolitions on Spears Street recently. The city clerk stated she had not seen any fires or material being buried in recent days. I attempted to make contact the fire department with no success. 64493	11/19/2025	11/24/2025	Quality Tree	Other	/Cape Girardeau	SERO	HC	Phone Conversation
Concerned Party: Anonymous Concern Info: CP States: There is a tree company (Advance Tree - Now seeing Quality Tree there as well), they are burning logs and brush for months on end. The fire constantly smolders. Everyday it is constant smoke throughout the community area. The most recent fire has been burning for over a month. CP is concerned with health of those in the area due to constant smoke and longevity of the burn. They have had the fire department out there multiple times due to fires getting out and smoke complaints (Gordonville Fire Department). They continually add logs to the pile so it never goes out. [sic] Conclusions: On November 25, 2025, I arrived at the location and viewed the burning while in the vehicle from the road. There was a pile of vegetative waste smoldering at the time of the investigation, but it did not appear to contain any prohibited material. Based on information gather through prior visits there is a possibility one property is occupied within the 200 yard distance requirement but that is unclear. Other occupied structures with the 200 yard distance are owned by Gary Hill so they do not apply. On December 2, 2025, I left a voicemail with Quality Tree Service explaining the concern and explaining talking points such as manageable piles, supervision and burning after dark.

64494	11/19/2025	11/25/2025	Buchheit	Other	Biehle /Perry	SERO	BG	Phone Conversation
Concerned Party: Anonymous Concern Info: Incident Description: Seed cleaning and feed milling operation releasing gross excess of agriculture dust comprised of seed cleaning fibrous material and grain dust resulting in obvious heavy coating of this material in the surrounding residential area. Concerns are obviously heavily polluted air in a residential area, pollution from airborne pesticides and herbicides coated on grain material, as well as a general nuisance of heavy fibrous dust pollution. EPA RECEIVED THIS CCNCERN 10/6/2025 AND SENT TO MODNR 11/19/2025 DUE TO GOVERNMENT SHUTDOWN. [sic] Conclusions: On November 25, 2025 I conducted an investigation for this concern. Please see Letter of Unsatisfactory Findings dated 12/12/2025 for findings.								
64498	11/20/2025	11/24/2025	Unknown	Odor	St. Louis /St. Louis City	SLRO	RA	
Concerned Party: Beth Deeken Concern Info: We received an odor concern from the I-70/I-270 Area Online Odor Concern Form. The CP is experiencing a strong Petrochemical, Smoky or Burning, Solvent or Chemical smell. It smells like this fairly frequently. Not sure there is much to do about it. [sic] Conclusions: An investigation was conducted and we did not encounter any strong odors.								
64500	11/20/2025	11/25/2025	Spring River Lumber - Mike Renfro	Other	Caulfield /Howell	SERO	HC	Site Visit
Concerned Party: Steve Helm Concern Info: CP States: Neighboring property is Spring River Lumber and they have a huge fire going. It is stacked with huge logs and scrap wood into a pile and burned. Fire is in close proximity to powerlines, large propane tank and residential houses. CP says this happened previously and was reported so they moved the location of the fire to a safer location out back of property. They have now moved the fire location back to the unsafe location and are burning large fires with flames over 20 feet high. [sic] Conclusions: On November 25, 2025, an inspection was conducted to ensure compliance with Missouri Air Conservation Law. For full details, please refer the inspection report issued to Spring River Lumber, dated December 9, 2025. On December 2, 2025, I attempted to make contact with the concerned party at both phone numbers provided. One was unavailable to the other did not have a voicemailbox set up so no message was able to be left. I will speak with the Concerned Party if a call is received.

64502	11/18/2025	11/24/2025	Residential Building	Open Burning	Fenton /Jefferson	SLRO	RA	
Concerned Party: Anonymous Concern Info: We received an open burning concern from the DNR website. The CP states: Our neighbors at 103 Valley Dr. Fenton MO 63026 (we live at 208 major dr, up the hill) continuously burn waste and plastic that billows up the hill and into our house and across the city. We have a young child and its noxious gas that smells of burning plastic and chemicals [sic] Conclusions: A site investigation was conducted. We did not find any violations from the public road. A compliance assistance letter will be sent to the current resident and the owner.								
64503	12/09/2025		Botkins Lumber	Other	Farmington /St. Francois	SERO	HC	Site Visit
Concerned Party: Anonymous Concern Info: Received by email. CP States: The lumber company is burning treated wood that dumps the smoke into our warehouse even with the doors closed. Guys are complaining about headaches and sore throats. [sic] Conclusions: On December 10, 2025, I arrived on site and was greeted by David Walker . I explained the meaning of the visit and provided a business card. David escorted me around the facility while explaining the process of the facility. The facility only handles untreated and unpainted wood. The facility uses wood scrap to fuel their kiln and for space heat in the colder months. David showed me all the scrap wood to be burned and the processes which generates the wood scraps. There were no prohibited materials noted in the scrap bins waiting to be burned. David was unaware of any wood that could be burned in the furnaces that would be treated or painted. I thanked David for the time and left the facility.
